

Fibia chooses Genexis ONTs for large-scale XGS-PON expansion

Genexis, the European leader in innovative broadband solutions, has won a significant contract with Fibia, one of Denmark's leading fiber network providers. Fibia has selected Genexis' Optical Network Terminals (ONTs) for its full-scale XGS-PON rollout, reinforcing Genexis' position as the leading ONT partner in Europe's fiber broadband market.

Fibia's decision to partner with Genexis highlights the importance of innovation and open collaboration in the fiber industry. "We chose Genexis because they are not just a supplier; they are a creative and innovative partner who listens to us and understands how to carve a path forward. Their interoperable ONT solutions make network upgrades easy and efficient, which is crucial for our ambitious XGS-PON rollout," says Sten Nielsen, CTO of Fibia.

Arne Grondvedt, Managing Director at Genexis Denmark, comments: "We are delighted to be chosen by Fibia for their XGS-PON deployment. This agreement reflects our close relationship and Genexis' commitment to delivering cutting-edge fiber broadband solutions tailored to the needs of Fibia."

The large-scale contract further establishes Genexis as the leading provider of next-generation fiber solutions. "Denmark is an important market for Genexis," says Gerlas van den Hoven, Genexis CEO. "The partnership with Fibia underlines our dedication to delivering innovative and sustainable solutions to frontrunners in the market. We look forward to working closely with Fibia to ensure the seamless rollout and an exceptional user experience for Fibia customers"

About Fibia

Fibia is one of Denmark's leading providers of fiber-based internet, with a strong presence in Eastern and Central Jutland. We own and operate an extensive fiber network that currently covers more than 700,000 homes passed (HP) and serves over 400,000 active customers (HC).

With a focus on high quality, efficient rollout, and future-proof technology, we continuously invest in network expansion and upgrades – including our ongoing transition to XGS-PON, ensuring greater capacity and an even better customer experience. Fibia is owned by the energy cooperatives NRGi and Andel and combines a strong local foundation with a professional and customer-oriented approach.

About Genexis

Genexis brings the world to everyone's home. We enable people to participate in the digital society and access essential services and applications. Fast and user-friendly digital connectivity improves people's quality of life and positively impacts their world. By creating innovative, more sustainable, and intuitive products, we make it easy for homes to connect to the world.

Genexis is a leading European vendor of innovative broadband solutions for the home. Our customers are network operators, internet service providers, and fiber network installers. Genexis' portfolio consists of ONTs, residential gateways, extenders, open-source-based operating systems, and communication management software. We are a European company headquartered in Stockholm (SE) and Eindhoven (NL). Genexis has a Sustainability Linked Bond listed on Nasdaq Stockholm and has earned the EcoVadis Gold medal for sustainability.
