Seamless fiber and CATV integration: introducing the Genexis FiberBox XGS2120

Genexis, the European leader in innovative broadband solutions, introduces the FiberBox XGS2120. Unlike other ONTs, the Genexis FiberBox XGS2120 enables operators with existing cable infrastructure to roll out fiber without disrupting existing in-home coaxial cable infrastructure. This ensures an easy and cost-effective transition while maintaining traditional TV service subscriptions. The FiberBox XGS2120 is unique in its combination of XGS-PON with CATV support and its small form factor.

A smooth transition to fiber

Many existing broadband networks rely on coaxial infrastructure for television services, making a full switch to IPTV challenging in the short term. The FiberBox XGS2120 addresses this challenge, enabling seamless fiber-to-the-home (FTTH) deployment while preserving CATV functionality. This allows operators to modernize their networks without forcing customers to abandon their familiar TV setups, avoiding potential revenue loss from decreased ARPU.

This innovative solution makes the transition from cable to fiber more efficient and cost-effective while enhancing the end-user experience. The FiberBox XGS2120 supports analog CATV, ensuring compatibility with existing setups while offering a clear path toward full IP-based services.

ONTs for every deployment

Genexis offers ONT solutions tailored for all fiber deployments and upgrades. Ensuring that every household, regardless of its infrastructure, can benefit from high-speed fiber connectivity.

“With the FiberBox XGS2120, operators no longer have to choose between fiber and traditional TV services,” says Martijn Rooijackers, Head of FTTH Products at Genexis. “This

ONT makes it easier than ever to introduce fiber while keeping CATV available, making network upgrades smoother for everyone.”

About Genexis

Genexis brings the world to everyone’s home. We enable people to participate in the digital society and access essential services and applications. Fast and user-friendly digital connectivity improves people's quality of life and positively impacts their world. By creating innovative, more sustainable, and intuitive products, we make it easy for homes to connect to the world.

Genexis is a leading European vendor of innovative broadband solutions for the home. Our customers are network operators, internet service providers, and fiber network installers. Genexis’ portfolio consists of ONTs, residential gateways, extenders, open-source-based operating systems, and communication management software. We are a European company headquartered in Stockholm (SE) and Eindhoven (NL). Genexis has a Sustainability Linked Bond listed on Nasdaq Stockholm and has earned the EcoVadis Gold medal for sustainability.
