

Genexis earns third consecutive EcoVadis Gold Medal, solidifying top 1% status

Genexis, the European leader in innovative broadband solutions for the home, is proud to announce that it has been awarded the Gold Medal by EcoVadis, the leading global sustainability rating provider. This marks the third consecutive year that Genexis achieves this prestigious recognition, placing the company among the top 1% in the industry.

Sustainability that builds trust

Receiving Gold three years in a row is more than a medal – it reflects Genexis' dedicated commitment to measurable impact. This year's assessment confirms that Genexis is among the top 2% of companies rated globally and is now recognized as a leader in carbon management. Each EcoVadis cycle helps us in pushing out ambitions by strengthening our policies, implementing new measures, and driving real progress – from reducing our environmental footprint to advancing responsible sourcing. Just as important, we share this progress openly and transparently, giving customers and partners confidence that sustainability at Genexis is not a one-time achievement, but a lifelong commitment and accountable journey.

EcoVadis: Pioneers in sustainability ratings

EcoVadis, the world's leading sustainability ratings provider, offers a comprehensive assessment framework covering four key themes: environment, labor & human rights, ethics, and sustainable procurement. These assessments are aligned with global standards like GRI, UNGC, and ISO26000. This approach reflects Genexis' advanced sustainability management system and our alignment with EcoVadis' vision: a global marketplace where sustainability intelligence drives better business decisions and long-term value for people and planet.
