Genexis launches FiberBox P2110 to simplify FTTH deployment across mixed fiber environments

Genexis, the European leader in innovative broadband solutions, today announces [FiberBox P2110](#), an entry-level 1G standalone fiber network terminal (NT) designed for fast installation, simple upgrades, and cost-efficient deployment in Point-to-Point (PtP) fiber networks.

ONTs for every deployment

FiberBox P2110 expands Genexis' extensive PtP and PON portfolio by adding a compact, standalone 1G PtP option. It is designed for operators managing mixed architectures, including open-access and multi-ISP environments.

Built for mixed network environments

"Operators are consolidating networks, operating models, and service tiers, and they need the flexibility to deploy the right solution in each part of the network," says Reinier Kramer, COO at Genexis. "With FiberBox P2110, we add a compact standalone option to our PtP and PON portfolio, enabling customers to simplify operations while serving mixed network realities."

Designed for efficient rollout

FiberBox P2110 is designed to support efficient PtP rollouts at scale. It supports TR-096 provisioning for remote configuration, runs on Genexis' IOWRT software, and is housed in a standalone form factor compatible with existing infrastructures. Its compact 114 × 114 mm footprint enables flexible placement, while its design incorporates 80% recycled plastics and a halogen-free PCB.

Average power consumption is 20% below the target set by the European Code of Conduct on Energy Consumption of Broadband Equipment, reinforcing Genexis' focus on more energy-efficient broadband networks.

About Genexis

Genexis brings the world to everyone's home. We enable people to participate in the digital society and access essential services and applications. Fast and user-friendly digital connectivity improves people's quality of life and positively impacts their world. By creating innovative, more sustainable, and intuitive products, we make it easy for homes to connect to the world.

Genexis is a leading European vendor of innovative in-home broadband solutions, serving network operators, internet service providers, and fiber network installers.

The portfolio includes ONTs, residential gateways, extenders, open-source-based operating systems, and communication management software. With headquarters in Stockholm (SE) and Eindhoven (NL), Genexis has earned the EcoVadis Gold Medal for sustainability for the past three consecutive years.
