

PRESS RELEASE

Stockholm, 18 May, 2026

Reuse and Connect with the Genexis MDU solution

Genexis, the European leader in innovative broadband solutions, brings the world to everyone's home with cost-saving, multi-gigabit solutions. As FTTH networks mature from adoption to activation, many operators are looking to turn fiber deployments into real value, even in transitioning environments. This includes multiple-dwelling units (MDUs) with legacy cabling and costly logistical barriers to fiber broadband. At [ANGA COM 2026](#), May 19-21, experience a live demo of our MDU solution, FiberBridge, which enables operators to provide high-speed broadband by reusing existing in-building cabling and connecting each apartment to a fiber network.

Genexis highlights at ANGA COM 2026 include:

Introducing FiberBox P2110: 1G standalone Fiber Network Terminal

FiberBox P2110 is the latest addition to our Point-to-Point (PtP) and PON portfolio, offering a standalone, compact form factor that simplifies FTTH deployment in mixed environments, including open-access and multi-ISPs. With the flexibility of wall-mount or desktop placement, P2110 features a 1G SC/APC WAN interface, a 1G Ethernet LAN port, and Genexis' award-winning open-source software, IOWRT.

Experience a live demo of the Genexis FiberBridge MDU solution

Also known as Gigabit Any Media (GAM), FiberBridge enables fiber-like broadband speeds by reusing existing legacy cabling in multi-dwelling units (MDU). Our solution supports full OMCI integration, allowing seamless management across diverse OSS/BSS systems and OLT platforms. Fiber network deployment and operations are easier than ever, especially in buildings with mixed vendor environments. Together with our partner, Positron Access Solutions, we will demo the full benefits of FiberBridge.

About Genexis

Genexis brings the world to everyone’s home. We enable people to participate in the digital society and access essential services and applications. Fast and user-friendly digital connectivity improves people's quality of life and positively impacts their world. By creating innovative, more sustainable, and intuitive products, we make it easy for homes to connect to the world.

Genexis is a leading European vendor of innovative in-home broadband solutions, serving network operators, internet service providers, and fiber network installers.

The portfolio includes ONTs, residential gateways, extenders, open-source-based operating systems, and communication management software. With headquarters in Stockholm (SE) and Eindhoven (NL), Genexis has earned the EcoVadis Gold Medal for sustainability for the past three consecutive years.
