

Sandbäckens, part om Nimlas Group, starts its second electricity company

Sandbäckens, part of the Nimlas Group, starts its second electricity company - Sandbäckens El & Automation in Gothenburg. The investment is part of Sandbäckens 5-50-500 strategy: 5 billion in turnover, 50 new companies, 500 million in profit and we plan to grow strongly in all disciplines. The goal is for the electricity segment to have a turnover of 1 billion in the next few years.

- The start-up of the company is another step in our journey as a multidisciplinary installation group and with the establishment we are broadening our offer in the west, says Lars Larsen, Regional Manager El.

Niclas Andersson is the Manager Director for the company, and he has a solid experience in the electrical industry and has previously worked as an electrician, head of department, project manager and controller. The business consists of electrical and data installations as well as automation solutions. Examples of upcoming assignments are service, energy efficiency improvements and charging boxes for electric cars. Furthermore, consultation will be offered.

- Focus will be service and smaller contracts in the Gothenburg region and the surrounding area. And we will follow our customers and carry out work where we contribute the most, says Niclas Andersson, MD of Sandbäckens El & Automation in Gothenburg.

Sandbäckens enables the company to establish itself and can develop as an independent and business-driven subsidiary. Niclas continues:

- Being able to start an electricity company from scratch with the support of Sandbäckens is a perfect match! My colleagues and I can shape the culture, and we bring with us structures such as business systems, purchasing agreements and other support functions from the group.

- Sandbäckens is focused on profitable growth, which gives us the right direction. I like that there is a lot of freedom and responsibility at the same time.

The company started operations in January 2025. More about Sandbäckens El & Automation Gothenburg on the website <https://www.sandbackens.se/el-automation-goteborg>
