Nimlas Group launches 4-40-4: from SEK 10 to SEK 40 billion – and from the Nordics to Europe

Stockholm 9 June 2026. Nimlas Group today launches 4-40-4. A growth strategy to increase net sales from SEK 10 billion to SEK 40 billion, with an EBITA target of SEK 4 billion by 2031. The strategy also takes Nimlas into four new markets, starting with Poland and Germany. The move follows the company's track record of exceeding targets and delivering market-leading growth and profitability in Sweden, Finland and Norway.

"Nimlas was never built for a SEK 10 billion finish line. Since 2021, we've built the fastest growing and most profitable installations group in the Nordics, in the toughest market conditions in decades. As we now take our operational engine into Germany and Poland, we see it as going from the domestic league to the Champions League: higher ambitions, faster growth and bigger wins," says Christoffer Järkeborn, CEO of Nimlas Group.

Nimlas was founded to become the most successful company in the technical installations industry. Since its founding, it has gone from a handful of companies to close to 150. From a few hundred professionals to 5,000 – and from SEK 1.5 billion to SEK 10 billion in net sales. Behind the rapid growth is an engine, and the way it works is simple: each local company keeps its brand, its people, and full ownership of results. Nimlas sets the direction and contributes operational expertise, tools, systems and purchasing power.

That engine now powers the next phase. In Sweden, Finland and Norway, Nimlas is pushing to double its size and become the region's largest installations group by 2031 through accelerated acquisitions and continued organic growth.

"The technical installations market in the Nordics is fragmented and there are still many great companies suited to be part of Nimlas Group. With our engine, these companies become even better, which in turn enables us to strengthen our tools for growth and continue our race to be number one in the region," says Christoffer Järkeborn, CEO of Nimlas Group.

Beyond the Nordics, Nimlas is taking its engine into new European markets, starting with Poland and Germany. Poland is one of Europe's fastest-growing economies, with significant investment in infrastructure, digitalisation, defence and building modernisation. Germany is Europe's largest economy and is expected to become Nimlas' biggest market over time. In both markets, Nimlas will build strong local groups through a combination of greenfield investments and acquisitions.
