

Adopteq and Optima Business Solutions Unite to Help Organizations Transform Legacy Applications and Accelerate Digital Transformation

Adopteq is pleased to announce a strategic partnership with Optima Business Solutions. Optima Business Solutions specializes in delivering high-quality services across Public Sector, Public Safety, and Private Sector domains. Optima equips organizations with tools, technologies, and expertise to achieve their business goals efficiently.

This collaboration combines decades of expertise in IT strategy and consulting services, assisting organizations in building the right foundation for digital transformation. Whether modernizing and transforming legacy systems, migrating to the cloud, or developing a digital transformation roadmap, our strategic guidance ensures every step is purposeful, scalable, and secure. Together, Adopteq and Optima Solutions aim to empower public sector organizations such as government agencies, public safety organizations, healthcare providers, and private enterprises across North America to transform and modernize legacy application landscapes, unlocking the full potential of today's digital platforms.

Adopteq's solutions, such as InvestigatorPlus provide in-depth analysis of your source application and database landscapes with a focus on transformation, MigratorPlus provides seamless migration and archival capabilities, and the web application Archive Viewer Plus delivers an easy, responsive and compliant way for users to search and view their archived data which together supports a complete legacy transformation journey. These solutions allow you to effectively transition from legacy platforms like Domino (commonly known as Lotus Notes), Microsoft Access, and InfoPath to modern solutions such as Microsoft Dataverse, Power Apps, SharePoint, and other third-party platforms.

Together, this partnership ensures a seamless and integrated transition, addressing every stage of digital transformation: strategic planning, expert consulting, detailed environment analysis, secure data archival, full-scale migration, and development of modern target technologies.

Partners in Delivering Digital Transformation Excellence

By uniting Adopteq's technology with Optima's experience across both legacy and modern platforms, organizations gain access to a scalable, efficient, and future-ready transformation path. This collaboration empowers clients to confidently decommission outdated systems while ensuring data integrity, regulatory compliance, and improved usability in the new environment.

The strength of this partnership lies in its ability to accelerate digital transformation, helping organizations move faster, reduce risk, and maximize return on investment.
