

Systemair at Nordbygg: The Straight Way to Correct Ventilation

Skinnskatteberg, 21 April 2026 – Systemair (NASDAQ Stockholm: SYSR) participates at Nordbygg 2026, showcasing the breadth of one of the market’s most complete ventilation portfolios. With product innovations across all areas, the company meets the entire value chain with proven innovation and limitless flexibility — from individual products to complete ventilation solutions.

The booth features several new products developed to simplify design, installation, and operation without compromising reliability or performance. Highlights include:

- MiniByter – a new renovation unit replacing old Bahco Minimaster on a 1:1 basis
- Advanced remote support with Systemair Access – saves time and enables safer commissioning and optimized operation
- New backflow protection for fans in operation – increases safety and operational stability
- Axial fans with EC motors – offering high energy efficiency, modern control, and improved performance
- Garage fans are now included in the fan portfolio to meet the needs of infrastructure projects

Together, these innovations demonstrate how Systemair can meet all ventilation needs — from individual components to integrated solutions.

At Nordbygg, Systemair presents its **broad air handling unit portfolio** — from compact standard units to flexible, customized solutions for more demanding projects. One of the major news items is the further development of the Systemair Access control platform, now featuring remote commissioning capabilities and extended trend logging for optimized operation and energy use in air handling units. This enables Systemair to support customers faster, more efficiently, and with high quality.

Systemair shares the booth with Menerga, part of the Systemair Group, and together they present a **swimming facility project** where Menerga supplied the wet units and Systemair the dry units, complemented by roof fans, centrifugal fans, iris dampers, and demand-controlled VAV.

Systemair will also showcase its strengthened **fire safety offering**, including a complete range of backflow protection devices, smoke control and fire dampers, and smoke extraction fans, complemented by control and monitoring solutions — a natural part of the company’s holistic offering.

Welcome to Systemair’s booth: A16:14 at Nordbygg, Älvsjömassan Stockholm, 21–24 April 2026
