

PRESS RELEASE

Patrik Andersson appointed New Chairman of the Board at Consilium Safety Group

Gothenburg, Sweden, 1 July 2025 - Consilium Safety Group, a global leader in fire, flame, and gas safety solutions, announces that Patrik Andersson will assume the role of Chairman of the Board. Patrik brings extensive experience from senior leadership positions in global companies and will contribute with valuable expertise and new perspectives to Consilium's business and expansion journey.

"Consilium is a highly regarded and well-positioned company, backed by strong ownership and led by an exceptional CEO and management team. The company combines high technical competence with industry leading aftermarket coverage, making it a trusted provider of mission-critical infrastructure in highly regulated end-markets. Consilium's robust profitability provides a stable foundation for continued growth, supporting both organic development and selective acquisitions in both new products and services. I am truly looking forward to working together with the Consilium team," says Patrik Andersson.

Until May 2022, Patrik Andersson served as CEO and President of the publicly listed Loomis AB, a global leader in cash handling with 25,000 employees and revenues exceeding SEK 30 billion. During his tenure, he drove the company's internationalization and implemented a decentralized business model, not unlike that of Consilium. He has also previously served as CEO of Orkla Foods Sweden and currently sits on the boards of, among others, Cary Group and the listed company AAK.

Philip Isell Lind af Hageby, CEO of Consilium Safety Group, commented: "We are very pleased to welcome Patrik Andersson as the new Chairman of the Board. Patrik brings exceptional commercial acumen and a proven track record of driving international growth, especially in business service. His unique expertise in transforming hardware-focused businesses into customer value-oriented leaders, combining technologies, services and software into comprehensive solutions aligns perfectly with Consilium's strategic ambition to provide best-in class service to our customers who rely on Consilium's systems and services for their operations. We look forward to an exciting journey ahead with Patrik onboard."

Patrik Andersson assumed his role as Chairman of Consilium Safety Group on June 17.

About Consilium:

Consilium Safety Group is a world-leading solution provider of fire, flame and gas safety technologies and aftermarket services for the marine, energy, rolling stock and building sectors. By combining safety expertise with intelligent detection, the company contributes to protecting lives, values, and the planet through technology. What started in 1912 is today an international company driven by innovation. Consilium Safety Group is based in Gothenburg, Sweden, has more than 55 offices covering all time zones and strives to be a great place to grow for all its 1,000+ employees. Antin Infrastructure Partners own Consilium Safety Group.
