Wellspect HealthCare Expands Surity™ Portfolio in the U.S. with Surity™ Male External Catheter for Urinary Incontinence Care

Mölnadal, Sweden – April 30, 2026 – Today, Wellspect HealthCare launched the Surity™ Male External Catheter, a non-invasive solution for men living with urinary incontinence. This builds on the company's expanding portfolio of reliable urinary incontinence management solutions in the U.S., following the introduction of the Surity™ Female External Catheter earlier this year, and ahead of the anticipated launch of the Surity™ Urinary Management System.

Severe urinary incontinence affects more than 13 million Americans and their caregivers, turning daily routines into ongoing challenges¹. The condition can profoundly disrupt daily life and is often associated with sleep disturbances, increased risk of falls, dehydration, skin breakdown, and significant physical and emotional strain – for both patients and caregivers^{2, 3, 4, 5, 6, 7}.

Despite the availability of some management options today^{8, 9}, a substantial gap remains in providing effective, comfortable, and user-friendly solutions that can support the needs of men living with urinary incontinence.

The Surity™ Male External Catheter is a new non-invasive solution for men affected by urinary incontinence, suitable for use with compatible urine collection systems. By effectively diverting voided urine away from the body, Surity™ offers men and their caregivers a discreet, comfortable option in continence care. Developed with skin-friendly materials, it is suitable for up to 24 hours of wear and moves naturally with the body. Its distinctive features include a see-through design that supports easy placement and visual checks, a slim profile to reduce bulk, and a soft, non-woven backing material designed to be gentle on the skin.

“By expanding the Surity™ portfolio to include solutions for both men and women living with severe urinary incontinence, we aim to help address a clear gap in incontinence care,” said Chris Schlenk, Group Vice President at Wellspect HealthCare. *“Our goal is to offer solutions designed to support comfort, rest, and confidence for people facing these challenges each day.”*

Surity™ was created to address practical challenges related to dryness, comfort, dignity, and caregiver support within the urinary incontinence segment, reflecting Wellspect's commitment to improving quality of life for people managing continence care needs.

The launch of the Surity™ Male External Catheter builds on the positive feedback received for the Surity™ Female External Catheter, shared by women living with severe urinary incontinence and their caregivers. This feedback has highlighted ease of use, comfort, and fit.

“Surity™ has provided me with a practical option for my day-to-day life. It is easy to place and has integrated seamlessly into my routines, helping me feel confident in the management of my care,” said Dru Woodward*, who uses the Surity™ Female External Catheter as part of her daily care routine.

About Wellspect HealthCare

Wellspect HealthCare, a subsidiary of Dentsply Sirona, is a leading global provider of innovative medical devices dedicated to improving the quality of life for individuals with bladder and bowel dysfunction.

With approximately 1,200 employees worldwide, Wellspect is committed to making a real difference for people managing continence care needs, empowering them to live each day to the fullest.

Wellspect delivers solutions that support safe bladder and bowel management, while continuously enhancing the experience, clinical performance, and service quality for both healthcare professionals and the people in their care.

As one of the world's leading manufacturers of intermittent urinary catheters, Wellspect has been at the forefront of innovation since 1983 with its LoFric® brand, which introduced the first hydrophilic-coated catheter.

Wellspect has also pioneered the development of Navina™, an innovative transanal irrigation system designed to support individuals living with chronic bowel disorders.

With advanced Surity™, Wellspect provides reliable urinary incontinence care designed to restore comfort, rest, and confidence for people living with severe urinary incontinence and for their caregivers.

Every day, Wellspect strives to maintain the highest quality standards while minimizing the environmental impact of its products.

Headquartered in Mölndal, Sweden, Wellspect operates in more than 40 countries, offering life-enhancing solutions to people around the world. Dentsply Sirona, the world's largest diversified manufacturer of professional dental products and technologies, is listed on Nasdaq under the symbol XRAY.
