

Element Metech partners with HIOKI to support industries with high-precision electrical measuring instruments

Element Metech is excited to announce its appointment as an Authorized Service Partner (ASP) by HIOKI, a globally renowned manufacturer of high-precision electrical measuring instruments critical to the industrial sector. This partnership represents a significant milestone, positioning Element Metech as the official provider of calibration, repair, and maintenance services for HIOKI instruments across Europe.

As a leading, independent full-service provider, Element Metech offers one of Europe's broadest ranges of calibration services. This collaboration enhances Element Metech's capability to support industries that rely on accurate and dependable measurement tools to maintain quality and efficiency.

– We are proud to be chosen as HIOKI's trusted partner for calibration services across, said Niall Sterling, General Manager of Element Metech.

– This collaboration allows us to provide industry-leading calibration, repair, and maintenance services coupled with fast and reliable turnaround times for HIOKI's high-precision instruments, helping our clients maintain the accuracy and reliability essential to their operations. Together, we are committed to supporting industries with the precision and expertise they need to achieve their quality and performance goals.

Through this partnership, Element Metech will help ensure that HIOKI's instruments remain reliable and precise, meeting the demanding quality standards required across critical industrial processes. With a shared commitment to delivering excellence, this partnership empowers clients to optimize their operations, reduce downtime, and uphold stringent measurement and quality requirements.

About HIOKI

HIOKI
