

Cary Group awarded Gold in EcoVadis Sustainability Rating

Cary Group has been awarded a Gold Medal in EcoVadis' global sustainability assessment for 2025. At the same time, the company's overall score has increased from 65 to 85, placing Cary Group among the top five per cent of companies worldwide.

EcoVadis is a leading independent provider of business sustainability assessments. It evaluates companies against 21 criteria across four key areas: environment, labour and human rights, ethics, and sustainable procurement. Its methodology is based on internationally recognised standards, including the ten principles of the UN Global Compact, ILO conventions, GRI standards and ISO 26000. The results are compiled into an overall score on a scale of 0 to 100, together with a medal reflecting the company's relative performance.

The EcoVadis sustainability ranking is based on a company's performance relative to all companies assessed over the previous twelve months. Cary Group's Gold rating places the company among the top five per cent of companies globally.

"Increasing our score from 65 to 85 is clear evidence that our sustainability efforts are delivering results. Our ambition is to be the leading vehicle glass company in sustainability, which is of utmost importance to our insurance customers", says Anders Jensen, CEO of Cary Group.

Cary Group's climate targets have been validated by the Science Based Targets initiative (SBTi) as being aligned with the goal of limiting global warming to 1.5°C. By 2030, using 2022 as the base year, Cary Group aims to reduce its absolute Scope 1 and 2 greenhouse gas emissions by 42% and its Scope 3 emissions by 52% per million SEK of value added (gross profit).
