

## IFAT 2026: Tele Radio Demonstrates Next-Gen Wireless Remote Control

Gothenburg, March 23<sup>rd</sup>, 2026

*Tele Radio presents its latest safe and smart wireless control solutions at IFAT Munich, held from May 4 to 7, 2026 at the Trade Fair Center Munich. Visitors are invited to stop by for hands-on demonstrations and expert guidance at booth C4.114, where the company will showcase how safe wireless radio remote control solutions help operators work at a safer distance, maintain clear visibility, and keep equipment running reliably in demanding environments.*

Tele Radio's systems support a wide range of applications found in the water and wastewater, recycling, and municipal technology sectors — including pumps and valves, conveyors, compactors, cranes, and mobile machinery. The focus: maximum safety, uptime, and ease of operation.

Stefan Augste, Sales Director at Tele Radio Germany, said: "IFAT Munich will signify an important step toward Tele Radio's future. We will proudly put the spotlight on the new PAQ line, which brings safety improvements such as certification at Ple/CAT4/SIL3 level. Safety is our top priority, and we will never give up pushing the boundaries of what is possible in this field."

Along with its sister companies Åkerströms and Sistematica – all sailing under the Allgon Group flag – Tele Radio will be present at booth C4.114. As the world's leading trade fair for environmental technologies, IFAT brings together decision-makers and practitioners across water, waste management, and circularity – offering the ideal setting to explore safer and smarter ways to remotely control machines built for these purposes.
