

Fogmaker International AB Strengthens Position in Southeast Asia through Appointing Regional Manager

Fogmaker International AB, one of the leading global suppliers of fire suppression systems for machines and vehicles, is excited to announce the appointment of Fredrik Rönnqvist as regional manager for Southeast Asia.

Mr. Rönnqvist will lead the operations of Fogmaker Southeast Asia and is based in the company's representative office in Bangkok, Thailand. The appointment marks a significant milestone in strengthening Fogmaker's presence in the region. He is joined by newly appointed Office Manager, Panfah Treelao.

Rönnqvist comes from Fogmaker International's head office in Växjö, Sweden, where he has worked as a Key Account Manager and responsible for the Material Handling segment. This makes him especially suited for the position as Region Manager since the Asian branch will initially focus on Material Handling, Mining, and Buses.

The representative office focuses on meeting the evolving needs of customers in the region, promoting Fogmaker's advanced, environmentally friendly, and comprehensive fire suppression solutions. Sustainability and concern for the environment are important to Fogmaker International, and the company's suppressant Eco 1 is 100% PFAS Free and GreenScreen™ certified at the silver level. The system can be customized to meet the different needs of various sectors, a flexibility that makes it perfect for the diverse market of Southeast Asia. Fogmaker SEA combines Swedish quality with knowledge of the area.

Fredrik Rönnqvist says, "I am incredibly humbled by the opportunity and trust that management has put in me for this position and look forward to the challenge of strengthening Fogmaker's position in the region."

Johan Bjerstedt, sales manager at Fogmaker International, states, "Being close to the customer base is imperative to being able to build confidence and strong relations. Fredrik is the right person to widen Fogmaker's footprint in Southeast Asia."

About Fogmaker International AB

Fogmaker International, a subsidiary of Dacke Industri since 2022, is a leading provider of fire suppression systems with high-pressure water-based mist for engine compartments and other enclosed spaces. Based in Växjö with more than 100 employees and an annual turnover of about € 45 million, the company has its roots in Småland, Sweden, and is recognized as an industry leader in safety awareness. The Fogmaker system is the most tested and certified in the world and serves a wide range of sectors, including Buses, Mining, Material Handling, Forestry, Trucks, Construction Equipment, Agriculture, and Airports.
