

Fogmaker International AB Expands Global Reach through new U.S. Subsidiary

Fogmaker International AB, one of the world's leading suppliers of fire suppression systems for machines and vehicles, is proud to announce the launch of Fogmaker USA Inc.

Having previously operated in North America through an established partner network, the formation of a US subsidiary marks a significant milestone in strengthening Fogmaker's presence and moving closer to the market. While the partner network remains an important part of the company's strategy, Fogmaker USA represents a closer link to Fogmaker's head office in Sweden, including manufacturing and R&D.

Fogmaker USA will focus on meeting the growing demand for advanced and environmentally friendly fire suppression solutions, always with the core mission of protecting lives and minimizing damage.

Sustainability is a priority to Fogmaker and the company's fire suppression liquid, Eco 1, is 100% PFAS Free and GreenScreen™ certified at the silver level. Fogmaker's systems are among the most certified in the world and customizable to meet the needs of various sectors and applications. The company is active in eight distinct business segments and this flexibility makes it well suited to the diverse US market.

"We are thrilled about this new subsidiary and the opportunities it represents. It will allow us to better serve our valued customers in the USA. It is a significant step towards achieving our vision of creating safer environments globally," said Lars Alrutz, CEO of Fogmaker International.

"I am very enthusiastic about this opportunity and look forward to building a strong presence for this world-class product in the American market, serving the market with short lead-times and improved customer service." says Mikko Vuojolainen, General Manager of Fogmaker USA Inc.

About Fogmaker International AB

Fogmaker International, a subsidiary of Dacke Industri since 2022, is a leading provider of fire suppression systems with high-pressure water-based mist for engine compartments and other enclosed spaces. Based in Växjö, Sweden, with more than 100 employees and an annual turnover of about USD 45 million, the company is recognized as an industry leader in safety awareness. It serves a wide range of sectors, including Buses, Mining, Material Handling, Forestry, Trucks, Construction Equipment, Agriculture, and Airports, and is a market leader for fire suppression for buses.
