

Alstom at InnoTrans: transforming mobility visions into a fluid reality

27 June 2016 – Alstom will be at InnoTrans exhibition, the largest trade fair for the railway industry, which will take place in Berlin from 20 to 23 September 2016.

On this occasion, Alstom will reveal its zero-emission train for which it had signed in 2014 Letter of Intents with Landers of Lower Saxony, North Rhine-Westphalia, Baden-Württemberg, and the Public Transportation Authorities of Hesse.

At Alstom booth, you will embark on a journey to discover how the company masters all phases of its customers' railway project: design, build, operate & maintain as well as renew. Alstom will demonstrate, through tangible examples how it accompanies its customers from conception of its project, through manufacturing at scale, operation and maintenance, to renovation and renewal.

**Discover Alstom innovations and meet with our staff at InnoTrans
Hall 3.2 Booth 308**

About Alstom

As a promoter of sustainable mobility, Alstom develops and markets systems, equipment and services for the railway sector. Alstom manages the widest range of solutions in the market – from high-speed trains to metros and tramways – customised services (maintenance, modernisation,...) and infrastructure and signalling solutions. Alstom is a world leader in integrated railway systems. It recorded sales of €6.9 billion and booked €10.6 billion of orders in the 2015/16 fiscal year. Headquartered in France, Alstom is present in over 60 countries and employs 31,000 people today.
