

## **FOR IMMEDIATE RELEASE**

### **Dataloy Systems Partners with Lloyd's List Intelligence to Embed Risk Intelligence into Voyage Management**

**BERGEN – April 8, 2025** – *Dataloy Systems*, a trusted leader in innovative voyage management solutions, today announced a strategic partnership with *Lloyd's List Intelligence*, a global authority in maritime risk and compliance data. This powerful collaboration brings Lloyd's List Intelligence Risk and Compliance data into Dataloy's Voyage Management System (VMS) via Dataloy Widgets—enabling charterers, operators, and financiers to access seamless, embedded risk insights at the point of voyage decision-making.

For the first time, users are now able to assess vessel risk, compliance exposure, and operational anomalies directly within the Dataloy VMS platform. This integration addresses increasing regulatory demands and ensures efficient compliance practices without interrupting operational workflows.

#### **Enhancing Maritime Risk Management at the Point of Decision**

The maritime industry is navigating an era of heightened regulatory scrutiny, with sanctions enforcement becoming increasingly stringent. For charterers, evaluating vessel risk is no longer optional; it's essential. However, traditional methods of cross-referencing platforms and performing manual risk checks are inefficient and leave room for oversight.

The Dataloy-Lloyd's List Intelligence partnership eliminates these challenges by embedding risk intelligence directly into voyage management workflows through Dataloy Widgets, enabling users to access critical data at the point of decision-making.

"This partnership underscores our shared mission to simplify vessel compliance complexities in an increasingly regulated world," said Andrea Biasillo, CTO of Dataloy Systems. "By equipping charterers with real-time, intuitive risk intelligence, we are not just reacting to industry demands but anticipating them. Our Dataloy Widgets framework ensures that critical data is accessible precisely when and where it's needed."

"Risk intelligence should be accessible at the decision-making point," added Michael Dell, CEO of Lloyd's List Intelligence. "Our partnership with Dataloy demonstrates our unwavering commitment to empowering maritime professionals with the tools they need to safeguard global compliance while simplifying their day-to-day workflows. By reducing inefficiencies and

improving situational awareness, we're playing a pivotal role in securing the lawful and efficient movement of trade."

### **Key Benefits of the Integration:**

- **Assess Vessel Risk Ratings:** Obtain insights into a vessel's compliance history, ownership transparency, and trading behaviour.
- **Monitor AIS Anomalies:** Detect AIS interruptions, manipulation, and unusual vessel movements.
- **Evaluate Movement Risks:** Identify ship-to-ship transfers and irregular trading patterns.
- **Verify Flag and Ownership Data:** Access validated information to ensure regulatory compliance.
- **Streamline Risk Assessment:** Conduct due diligence effortlessly within a single platform.
- **Enhance Operational Confidence:** Make informed decisions supported by reliable and actionable data.

### **Driving Innovation in Maritime Compliance**

The integration of Lloyd's List Intelligence's leading compliance data with Dataloy's flexible and powerful platform sets a new standard for embedded risk intelligence in maritime operations. This partnership is a response to the evolving needs of the industry—and a proactive move toward smarter, more secure shipping.

### **About Lloyd's List Intelligence**

For over 290 years, Lloyd's List Intelligence has been the trusted independent partner for monitoring, assessing, and managing maritime risks. Leveraging unparalleled expertise and technology, we provide actionable insights and solutions that empower professionals across insurance, trade finance, shipping, and government sectors to make data-driven decisions with confidence.
