

Allgon Celebrates 70 Years of Tele Radio

Gothenburg, November 11th, 2025.

Allgon Group proudly congratulates Tele Radio on reaching an extraordinary milestone — 70 years of innovation, reliability, and global growth. What began in 1955 as a small venture has evolved into a world leader in Remote Technology, trusted by industries where safety, agility, and precision are essential.

With presence in over 25 countries and a strong global network, Tele Radio makes the backbone of Allgon Group's global reach as well as a strong grasp on many industries where safety, agile communication and reliable remote-control products are paramount.

Strategic integration within Allgon to accelerate value creation

In 2023, Allgon Group started the process of consolidating Tele Radio's R&D, product management, sustainability, quality, and compliance functions—together with sister brands Åkerströms and Sistemática—into a single operating framework. This integration aims to:

- Accelerate innovation through shared platforms and reusable modules.
- Broaden market coverage with a wider, complementary product range.
- Enhance operational efficiency through aligned roadmaps, procurement, and testing.
- Strengthen governance across safety, regulatory compliance, and sustainability.

The combined approach has already supported the launch of the next-generation PAQ handheld line, emphasizing functional safety, flexibility, and improved user experience for demanding industrial environments. As shared capabilities continue to grow, Allgon expects a steady cadence of platform updates, an expanded accessory ecosystem, and broader application coverage.

2030 and Beyond

Tele Radio plays a key role in the group's forward-looking strategy. As a driving force in product and technology development, the brand remains central to Allgon's long-term vision and future growth.

"Allgon and Tele Radio share a passion for innovation and reliability," said Linda Nyquist-Evenrud, Allgon's Group CEO. "Seventy years is a remarkable achievement, and we see a bright future ahead — with Tele Radio continuing to lead the way in our growth journey."

Information for the editors, not for publication

Allgon is a world-leading player in industrial radio control. We develop, manufacture, and deliver solutions in industrial radio control to customers around the world.

At Allgon, we have a long history of working with wireless communication. In recent years, we have focused our activities on the market for industrial radio control, where we are among the five largest players globally. Industrial radio control is used within a wide range of application areas in industrial production as well as in the construction and transport sectors. Our solutions often have a central and business-critical role in our customers' production and the safety of their employees. Industrial radio control helps to streamline the customers' business.

The majority of Allgon's turnover is in radio remote control systems through our brands Tele Radio, Sistemática, and Åkerströms.
