

Allgon Group to Showcase the Latest Remote Technology Solutions at IFAT Munich 2026

Gothenburg, March 20th, 2026

Allgon Group is proud to announce its participation in IFAT Munich, the world's leading trade fair for environmental technologies, held from May 4 to 7, 2026, at the Trade Fair Center Messe München.

In a powerful display of industrial synergy, Allgon Group will bring its three premier brands, Tele Radio, Åkerströms, and Sistematica, together. Visitors to booth C4.114 will experience a comprehensive portfolio of safe and smart wireless control solutions designed to enhance equipment operation in the most demanding environments.

Innovation Under One Roof

This year's exhibition serves as a milestone for the Group, highlighting the collective strength of its brands in serving the water, wastewater, and recycling sectors. By showcasing together, Allgon offers a "one-stop" destination for OEMs and operators looking for reliable performance in critical applications such as pumps, conveyors, compactors, and mobile machinery.

The Group is particularly excited to briefly spotlight the latest advancements within its product suite:

- Tele Radio will feature the safety-enhanced PAQ Line.
- Sistematica will introduce the versatile new Global Line.
- Åkerströms will present its robust radio remote control systems, along with immersive VR simulators for realistic operator training.

Together, Tele Radio, Åkerströms, and Sistematica represent the Group's commitment to pushing the boundaries of industrial safety, operational reliability, advanced training, and remote-control efficiency.

Expert Guidance and Hands-On Demonstrations

Pär Wahlstrand, Chief Market Officer at Allgon, commented:

"IFAT Munich signifies an important step toward our future. By bringing Tele Radio, Åkerströms, and Sistematica together, we provide our end-users with a more robust suite of tools to face their everyday challenges. We are especially proud to showcase the new products from Tele Radio and Sistematica, as well as highlighting Åkerströms' well-renowned, field-proven systems and VR training solutions, as they embody our paramount focus on safety, reliability, and innovation."

Allgon Group invites all attendees, decision-makers, and practitioners across the waste management and circularity sectors to visit booth C4.114 for hands-on demonstrations and expert guidance on the future of wireless machine control.

Information for the editors, not for publication

Allgon is a world-leading player in industrial radio control. We develop, manufacture, and deliver solutions in industrial radio control to customers around the world.

At Allgon, we have a long history of working with wireless communication. In recent years, we have focused our activities on the market for industrial radio control, where we are among the five largest players globally. Industrial radio control is used within a wide range of application areas in industrial production as well as in the construction and transport sectors. Our solutions often have a central and business-critical role in our customers' production and the safety of their employees. Industrial radio control helps to streamline the customers' business.

The majority of Allgon's turnover is in radio remote control systems through our brands Tele Radio, Sistematica, and Åkerströms.
