

Allgon strengthens its Nordic region and appoints Hanna Landell EVP, Nordics

Gothenburg, May 21st, 2026

Allgon announces a strengthened Nordic regional setup to accelerate collaboration across the Nordics and further increase customer value through clearer priorities, faster knowledge-sharing and stronger execution. As part of this development, Hanna Landell is appointed Executive Vice President (EVP) for the Nordic organization, alongside her role as CEO of Åkerströms.

The strengthened Nordic region is designed to support closer cross-border collaboration and a more unified approach to market insights, product priorities and operational execution, while maintaining the clear customer-facing identities of Allgon's brands.

"Strengthening our Nordic region will help us move faster together, closer to customers, with clearer priorities and stronger execution," says Linda Nyquist-Evenrud, Group CEO of Allgon. "Hanna brings strong commercial leadership and deep customer understanding. She is well positioned to connect teams and capabilities across the Nordics and help translate customer needs into the right priorities."

In her role as EVP, Nordics, Hanna Landell will focus on strengthening collaboration across the Nordic businesses, enhancing the shared loop from market insight to R&D to develop the right solutions for Nordic customers, and scaling what works, while supporting continued local market ownership and customer relationships.

"I'm excited to take on this expanded responsibility," says Hanna Landell, EVP, Nordics and CEO of Åkerströms. "We will build on what makes each team and brand strong, and at the same time improve how we share learnings, align priorities and turn customer insights into solutions that create value, both in the Nordics and globally."

Allgon's customer-facing brands, Åkerströms, Tele Radio and Sistemática, continue to operate as usual with clear local customer focus and support. The strengthened Nordic regional setup is intended to coordinate and amplify collaboration across the region.

Information for the editors, not for publication

Allgon is a world-leading player in industrial radio control. We develop, manufacture, and deliver solutions in industrial radio control to customers around the world.

At Allgon, we have a long history of working with wireless communication. In recent years, we have focused our activities on the market for industrial radio control, where we are among the five largest players globally. Industrial radio control is used within a wide range of application areas in industrial production as well as in the construction and transport sectors. Our solutions often have a central and business-critical role in our customers' production and the safety of their employees. Industrial radio control helps to streamline the customers' business.

The majority of Allgon's turnover is in radio remote control systems through our brands Tele Radio, Sistemática, and Åkerströms.
