# VOLVO 360 (1982-1989)

## **VOLVO 360 (1982-1989)**

Autumn 1982 saw the introduction of a new model in the Volvo range - the 360. The Volvo 360 was based on the 340 range and featured a 4-cylinder 2-litre engine together with a 5-speed gearbox. The "360" model designation was introduced to give these better-equipped and more powerful cars a profile of their own.

A year after the launch of the 360 Series, the range was expanded with a 4-door saloon featuring a conventional luggage compartment. This version gave the body a longer rear overhang and thus increased total body length as well.

As a more economical version than the 360 saloon, the 340 series was also produced in 4-door saloon shape (79,964 cars of this 340 version being made).

A sportier variant called the 360 GLT was also introduced at the same time, powered by a fuel-injected version of the same engine.
