Volvo V40 - model year 2017

The V40 is Volvo's compact 5-door premium hatchback in the C-segment. It went into production in 2012 and has been one of Volvo's best-selling models ever since.

In 2016 the V40 received a major refresh, receiving the new face of Volvo with a distinctive concave grille, containing the new Volvo logo, and the "Thor's Hammer" headlights first seen on the new XC90.

In addition to the exterior design updates a range of new interior and exterior colour and trim options were added.

Powertrain

As with all Volvo's, the powertrain offer is based on Drive-E 2.0 litre turbo- and super-charged engines designed and built at Volvo's engine factory in Skövde.

The [Drive-E range](#) of low emission, high performance, petrol and diesel powertrains offer a perfect blend of driver enjoyment and fuel economy, whilst retaining a responsive feel for city driving.

More details around the powertrain offer can be found in the [Technical Specifications](#).

Connectivity

The V40 offers a full range of connectivity options in its Sensus user interface, including Volvo On Call, a phone-based app that allows you to control certain features in your car, (such as pre-heating, locking and unlocking, navigation, vehicle location services and other features). Volvo On Call now works with wearables such as Apple Watch and Android Wear and also has Windows 10 compatibility, meaning that Volvo On Call can now be operated from your PC as well as your smartphone.

Sensus delivers a range of native apps offering streaming music via TuneIn and Baidu and geo-location services such as Yelp and Wikilocations. [Read more about Sensus in our factsheet](#).

Safety

The V40 comes with one of the most comprehensive standard safety offers available in the segment, including City Safety, which offers a range of collision avoidance and mitigation functionalities including pedestrian and cyclist detection.

[See the Intellisafe factsheet for more information.](#)
