# Volvo Car UK offers more choice and enhanced performance with new model versions, new trim levels and new technology

- Updated XC60 mid-size SUV with refreshed styling and new features
- Fully electric EX90 seven-seat SUV range grows with new Single Motor version and Plus trim level
- Pricing and specification announced for new EX30 Cross Country
- Larger battery increases driving distance of EC40 and EX40 Single Motor Extended Range versions
- Introduction of new Plus Pro equipment grade on selected models
- Further roll-out of new Volvo Car infotainment user experience with more powerful Qualcomm computing platform

Spring brings a wealth of activity across Volvo Cars' UK model range, extending consumer choice and raising product appeal with new model versions, trim levels and technologies. The latest introductions demonstrate Volvo Cars' commitment to keeping pace with customer tastes and requirements, and providing a wide choice of electrified powertrains – be that fully electric, plug-in hybrid or mild-hybrid.

### **New look and new features for the XC60**

The XC60's status as Volvo Cars' top-selling model globally is strengthened with a series of updates in a wide-ranging refresh programme for 2025. The updated mid-size SUV is marked out by sharp new exterior styling with a new-look grille, fresh alloy wheel designs and dark-finished rear lamp clusters.

There are arguably even bigger changes inside. The interior is updated to bring the latest user experience (UX) – as already seen in the EX30, ES90, XC90 and EX90 – to the XC60, accessed via a faster and more responsive infotainment system, complete with a larger 11.2-inch touchscreen. Practicality and clean, minimalist styling are combined in a redesigned central storage console and wireless charging pad, while the cabin environment has been further enhanced with improved sound insulation measures. There are also new upholstery choices, including bio-attributable Nordico and a navy herringbone woven fabric.

Three powertrains are available: the B5 mild-hybrid petrol and T6 and T8 petrol-electric plug-in hybrids. On-the-road prices start at £49,240 for the B5 Core version and extend to £69,860 for the T8 Plug-in Hybrid Ultra Black Edition.

### **EX90 range grows with new Single Motor version and Plus trim level**

The flagship EX90 fully electric large SUV range has been extended with the addition of a new Single Motor, rear-wheel-drive version and Plus trim level.

The new powertrain features a 104/100kWh (nominal/usable) capacity battery in a powertrain that delivers a maximum of 279hp and 490Nm of torque, enabling 0-62mph in 8.4 seconds. With electric consumption of up to 3.4 miles per kWh, the EX90 Single Motor has a range of up to 380 miles on a full charge.

The new Plus trim level is available for both Single Motor and Twin Motor versions, giving the

seven-seat SUV a new entry-level on-the-road price of £82,660. The equipment specification remains in line with the model's premium status, including four-zone climate control, a panoramic sunroof, head-up display, 14.5-inch touchscreen control system and a 360-degree camera set-up all provided as standard. Twin Motor versions also come with air suspension and adaptive dampers.

### **EX30 Cross Country pricing and specification**

The EX30 small SUV is the latest model to follow the Volvo Cross Country tradition of more rugged looks and performance.

Introduced as a single variant, it is based on the EX30 Twin Motor Performance Ultra. Its Cross Country credentials are exhibited by stylish and practical exterior details, including matt black front and bootlid shields, bespoke front and rear bumpers with integrated skidplates, and matt black wheelarch extensions. The 19-inch alloy wheels have a dedicated design with a matt finish.

The EX30 Cross Country is engineered for tackling rougher surfaces thanks to all-wheel drive and ground clearance increased by 19mm. Its suspension is tuned for a smoother ride, too.

Available to order now, the EX30 Cross Country has an on-the-road price of £47,060.

### **Larger battery added to EC40 and EX40**

The introduction of a larger battery has increased the driving range of the EC40 compact crossover and EX40 compact SUV. The Single Motor Extended Range versions of both models are now equipped with an 82/79kWh (nominal/usable) capacity unit, replacing the previous 78/75kWh battery. The principal benefit is an increase of around 15 miles in driving range – up to a maximum of 360 miles for the EC40 (previously 346 miles) and 358 miles for the EX40 (previously 343 miles).

### **New Plus Pro trim level**

There is added customer choice with the introduction of a new trim level, Plus Pro, across the EC40, EX40, XC40, XC60 and XC90 model ranges.

Positioned between the established Plus and Ultra equipment grades, it provides both useful technology and additional styling features. On EC40, EX40 and XC40 models, highlights of its additional equipment include pixel LED headlights with adaptive shadow technology, LED front foglights with a cornering function and a 360-degree surround-view camera system. Together, these give the driver an enhanced view of the road ahead and the area immediately around their car, supporting safer driving and easier manoeuvring. On the XC60, the Plus Pro package includes 20-inch alloy wheels, complete with a contrast diamond cut/black finish, and soft Nappa leather ventilated upholstery, while XC90 Plus Pro versions receive 21-inch wheels and the ventilated Nappa leather seats.

### **Further roll-out of faster, smarter infotainment UX**

The roll-out of the new-generation Volvo Car infotainment user experience continues with the EC40, EX40, XC40, V60 and V90 being the latest models to gain the new technology package. The new Snapdragon Cockpit Platform from Qualcomm Technologies also delivers more than twice the response speed and 10 times faster graphics generation than the previous system.

With simplification as a guiding principle, the UX is designed for safe, easy and enjoyable interaction with the car's multimedia functions, with the most frequently used apps and features located on the home screen. Google services, including Google Maps, Google Assistant and access to the Google Play store, are also built in.

### **Find out more**

All the new and updated models are available to order now, with deliveries to UK customers from this summer. To find out more about these and all other Volvo cars, and to use the online configurator, please visit [www.volvocars.co.uk](http://www.volvocars.co.uk).

### **Notes to editors:**

- Range according to the WLTP driving cycle under controlled conditions for a new car. Real-world range may vary.
- Snapdragon is a trademark or registered trademark of Qualcomm Incorporated. Snapdragon is a product of Qualcomm Technologies, Inc. and/or its subsidiaries.
- Google, Google Play and Google Maps are trademarks of Google LLC.

### **Volvo Cars in 2024**

For the full year 2024, Volvo Car Group recorded a record-breaking core operating profit of SEK 27 billion. Revenue in 2024 amounted to an all-time high of SEK 400.2 billion, while global sales reached a record 763,389 cars.

### **About Volvo Car Group**

Volvo Cars was founded in 1927. Today, it is one of the most well-known and respected car brands in the world with sales to customers in more than 100 countries. Volvo Cars is listed on the Nasdaq Stockholm exchange, where it is traded under the ticker "VOLCAR B".

*"For life. To give people the freedom to move in a personal, sustainable and safe way." This purpose is reflected in Volvo Cars' ambition to become a fully electric car maker and in its commitment to an ongoing reduction of its carbon footprint, with the ambition to achieve net-zero greenhouse gas emissions by 2040.*

As of December 2024, Volvo Cars employed approximately 42,600 full-time employees. Volvo Cars' head office, product development, marketing and administration functions are mainly located in Gothenburg, Sweden. Volvo Cars' production plants are located in Gothenburg, Ghent (Belgium), South Carolina (US), Chengdu, Daqing and Taizhou (China). The company also has R&D and design centres in Gothenburg and Shanghai (China).
