New over-the-air update for Volvo cars now available, adding Apple® CarPlay® support

This week marks the start of the rollout of Volvo Cars' latest over-the-air (OTA) software update to all Volvo cars with Google built in, enabling a variety of feature and quality improvements.

One of the new functionalities will include the rollout of Apple CarPlay, enabling iPhone users to feel even more at home in their Volvo car.

Users can now connect their iPhone via USB to their Volvo car and access apps from their iPhone, wherever Apple CarPlay is available.

Since the beginning of 2021, Volvo Cars has been offering OTA updates on a regular basis, and it is a key technology for delivering on the company's ambition of making customers' cars continuously better.

With continuous over-the-air updates, Volvo Cars aims to make ownership easier and more flexible. It enables customers to enjoy the latest software and new, updated features on their Volvo car via a few clicks on their in-car screen.

"Through over-the-air updates, we can make sure that our customers can enjoy new features quickly and easily," said Sanela Ibrovic, Head of Connected Experience at Volvo Cars. "It also means that a new Volvo car is no longer at its finest as it rolls off the factory floor, but keeps improving as we launch additional updates."

The previous OTA update, which was released in April, has been deployed to more than 197,000 cars. The most recent OTA release will be available in 14 new markets, and the company expects the volume of cars covered by such updates to grow with every new update.

Together with the April update, Volvo Cars also announced that all new Volvo car models are able to receive software updates, meaning that the company is making important progress towards its ambition of making its customers' cars better over time.

Notes to editors

- Availability of the features and services mentioned above may differ between markets
- The latest OTA update, including the rollout of Apple CarPlay, is now available in the UK

-ends-

Volvo Cars in 2021

Volvo Car Group recorded an operating profit of 20.3 BSEK. Revenue in 2021 amounted to 282.0 BSEK, while global sales reached 698,700 cars.

About Volvo Car Group

Volvo Cars was founded in 1927. Today, it is one of the most well-known and respected car brands in the world, with sales to customers in more than 100 countries. Volvo Cars is listed on the Nasdaq Stockholm exchange, where it is traded under the ticker "VOLCAR B".

Volvo Cars aims to provide customers with the Freedom to Move in a personal, sustainable and safe way. This is reflected in its ambition to become a fully electric car maker by 2030 and in its commitment to an ongoing reduction of its carbon footprint, with the ambition to be a climate-neutral company by 2040.

As of December 2021, Volvo Cars employed approximately 41,000 full-time employees. Volvo Cars' head office, product development, marketing and administration functions are mainly located in Gothenburg, Sweden. Volvo Cars' production plants are located in Gothenburg, Ghent (Belgium), South Carolina (US), Chengdu, Daqing and Taizhou (China). The company also has R&D and design centres in Gothenburg, Camarillo (US) and Shanghai (China).
