New Polestar performance package now available for the Volvo S90 and V90

Polestar has launched the new generation of its performance package for the new Volvo S90 and V90. Known as Polestar Performance Optimisation, the package upgrades the entire drivetrain and further improves driving dynamics.

The S90 and V90 are the latest models launched on SPA, Volvo Cars' new modular vehicle architecture that will underpin all new cars in Volvo's 90 and 60 series. After bringing its new performance package to the XC90 last year, Polestar now launches the same upgrades for the other two models in Volvo's top-of-the-line 90 range.

Rather than simply increasing engine performance, Polestar Performance Optimisation upgrades the entire drivetrain. By improving throttle and off-throttle response, gearshift speed and precision, as well as overall engine performance, the S90 and V90 become even more dynamic and fun to drive.

"We continue to enhance the performance of Volvo's new, class-leading SPA vehicle architecture and Drive-E powertrains. The S90 and V90 already offer excellent driving dynamics, and we are delighted to raise the performance level even further with Polestar Performance Optimisation," said Niels Möller, COO of Polestar, the Volvo Cars performance brand.

The performance package has been developed in close cooperation with the engineers and racing drivers of Polestar Cyan Racing.

"It is exciting to take the technology we use in our race cars and apply that to Volvo's road cars. We have created a balanced package that provides performance in all conditions, whether you are winning a race or driving actively on your favourite roads," said Thed Björk, who drives a Volvo S60

Polestar TC1 with Drive-E technology in the FIA World Touring Car Championship.

The first S90/V90 variant available for optimisation is the D5 PowerPulse diesel. The upgrade increases the engine's output from 235 hp and 480 Nm to 240 hp and 500 Nm. The upgrade costs £835.

All changes as part of the Polestar Performance Optimisation package are made with certified emissions, fuel consumption, service intervals and Volvo warranties unchanged. Learn more about the new-generation Polestar optimisation [here](#).

About Polestar

Polestar is the performance brand of Volvo Cars. The company was founded as a motorsport team in 1996 and has been successful in numerous championships, racing with various Volvo models. In 2009, Polestar started to offer performance-related products and thereby intensified the business relations with Volvo Cars. The first performance cars, based on Volvo's S60 and V60, were launched in 2014. In 2015, Volvo Cars acquired the performance unit of Polestar, as a strong commitment towards a credible performance offer and with the mission to define future premium performance.
