# Volvo EX30 and XC90 named 'Most Anticipated New Vehicles' of 2025 by Newsweek

**MAHWAH, NJ** (November 13, 2024) – Two Volvo car models, the 2025 Volvo EX30 and the new and improved 2025.5 Volvo XC90, have been selected by *Newsweek* as winners of 'America's Most Anticipated New Vehicles 2025' award.

The Volvo EX30 is the first small premium electric SUV from the Swedish brand. It is designed to have the smallest carbon dioxide footprint of any Volvo car to date and make people's lives safer, more convenient and more enjoyable through cutting-edge technology and Scandinavian design.

The EX30 has been one of the most popular EVs in Europe and will be coming to the U.S. this year with a very attractive and competitive starting price for the 422 horsepower Twin Motor Performance model with 253<sup>1</sup> miles of range. A Single Motor variant is scheduled to come to the U.S. later in 2025 with an even more affordable starting price.

At the other end of the spectrum is the XC90, a Volvo Cars icon. Thanks to a broad suite of technology and design updates inside and out, the award-winning and best-selling flagship SUV is now better than ever before. It's a premium seven-seater with 'comfortable' as its middle name. As one of the safest cars on the road, and in plug-in hybrid form, the XC90 is an outstanding electric car with a back-up plan.

A renewed interior enhances practicality while a larger central touchscreen with higher resolution improves the user experience with a world of new features, apps and regular over-the-air software updates.

Both the XC90 and EX30 are available for preorder now at [volvocars.com](https://www.volvocars.com) with the first customer deliveries scheduled to start later this year.

##

<sup>1</sup> Models equipped with 19-inch wheels have an EPA-certified electric driving range of up to 253 miles (MPGe: 116 city/ 100 highway/ 109 combined) when the battery is fully charged and under ideal driving conditions. Use for comparison purposes only. Your range and MPGe will vary for many reasons, including but not limited to, driving conditions, how and where you drive, how you maintain your vehicle, battery-package/condition, and other factors. ### **Volvo Cars in 2023**

For the full year 2023, Volvo Car Group recorded a record-breaking core operating profit of SEK 25.6 billion. Revenue in 2023 amounted to an all-time high of SEK 399.3 billion, while global sales reached a record 708,716 cars.

### **About Volvo Car Group**

Volvo Cars was founded in 1927. Today, it is one of the most well-known and respected car brands in the world with sales to customers in more than 100 countries. Volvo Cars is listed on the Nasdaq Stockholm exchange, where it is traded under the ticker "VOLCAR B".

"For life. To give people the freedom to move in a personal, sustainable and safe way." This purpose is reflected in Volvo Cars' ambition to become a fully electric car maker and in its commitment to an ongoing reduction of its carbon footprint, with the ambition to achieve net-zero greenhouse gas emissions by 2040.

As of December 2023, Volvo Cars employed approximately 43,400 full-time employees. Volvo Cars' head office, product development, marketing and administration functions are mainly located in Gothenburg, Sweden. Volvo Cars' production plants are located in Gothenburg, Ghent (Belgium), South Carolina (US), Chengdu, Daqing and Taizhou (China). The company also has R&D and design centres in Gothenburg and Shanghai (China).
