Volvo EX90 recognized by 2023 Green GOOD DESIGN Awards

(MAHWAH, NJ) April 24, 2023 – The 2024 Volvo EX90, Volvo Cars' fully electric flagship SUV, has been recognized as a winner of the 2023 Green GOOD Design Awards in the transportation category.

The Volvo EX90 supports Volvo Cars' plan to become a fully electric car company by 2030 and meets customer demand for a seven-passenger vehicle that can carry a family and their luggage. Amongst the first fully electric, three-row family vehicles, the Volvo EX90 balances the versatility of large vehicles with a responsibility to contribute to a cleaner, safer world for everyone.

Revealed on November 9, 2022, the Volvo EX90 rides on a dedicated electric platform that eliminates the need for luxury car buyers to decide between practicality and full electrification by offering up to 300 miles of tailpipe-emission-free driving range and the ability to charge from 10-80 percent in about 30 minutes.

The 2024 Volvo EX90 is now available for pre-order in the United States at volvocars.com/us. The seven-passenger Volvo EX90 will be available well-equipped for under \$80,000. All Americas-bound Volvo EX90 models are expected to be built at the plant in Charleston (Ridgeville), South Carolina.
