

Press Release

Nov 03, 2022 | ID: 305536

Join us for the reveal of the Volvo EX90 – our new fully electric flagship SUV

The Volvo EX90 will be revealed on November 9, 2022 at 9 AM ET, during a special event in central Stockholm. The reveal will also be livestreamed.

This is not just our latest car - it's the first of a new generation, fully electric and software-defined vehicles - representing the start of a new era for Volvo Cars.

For nearly 100 years, our purpose has been to innovate and set new standards to save more lives. With the Volvo EX90 we are continuing that legacy. Thanks to a unique combination of core computing and software, the Volvo EX90 introduces intelligent safety technologies such as lidar and a driver understanding system to help us progress towards our vision that no one should be killed or seriously injured in a new Volvo car. The Volvo EX90 will also bring a new level of connectivity, designed to become better, safer and more tailored to the driver over time. It introduces innovations to help you drive and live more sustainably – and design in line with our Scandinavian heritage. Finally, we've included features and services that make driving, charging and living with this car a great, truly effortless experience.

The Volvo EX90 is our vision of a large family SUV in the electric age, and we cannot wait to show it to you! During the reveal event, our CEO Jim Rowan and other senior leaders and experts will guide you through the tech, design and other key highlights, letting you explore the car in an immersive way.

The full reveal will be livestreamed via this link
