Volvo Announces V60 Sports Wagon Will Come to U.S. Market

ROCKLEIGH, N.J. (March 28, 2013) - Already a superstar in Europe, Volvo's V60 sports wagon soon will hit the shores of America.

Doug Speck, Volvo Cars' senior vice president marketing, sales and customer service, made the announcement at the New York International Auto Show, indicating the new V60 will come to the U.S. market in early 2014. Pricing and specifications will be announced at a later date.

The V60 R-Design on the auto show stand marks the global debut of the R-Design version of the car. It projects an elegant, curvy and sculptured appearance that equally straddles luxury and performance.

"The V60 builds upon our wagon heritage, and it's a beautiful evolution in design and direction for Volvo," said Volvo Cars of North America President and CEO John Maloney. "Many consumers will be glad to see the addition of this exciting sports wagon to the Volvo lineup in America. And this time, we've added sophistication with the dynamic driving performance of a sedan."

The new Volvo V60 is for people who want the handling of a dynamic sports sedan but need the versatility of a wagon. Now, forging a new path with the V60, the Scandinavian automaker reaches a new level of design and sophistication, blending styling cues from its best-selling sedan with a sleek, curvy silhouette.

At the heart of the extra versatility of the V60 is its intelligent seating. Rear seats can be folded down in three 40/20/40 segments, allowing its interior space to be configured for passengers and loaded in a remarkably flexible way.
