Volvo Cars model line for 2002 V70: What's new

For immediate release

V70

The security of all-wheel-drive returns to North America's most popular premium wagon with the availability of a special-order V70 AWD. Utilizing the proven viscous coupling system from the Cross Country, the addition of AWD brings a slightly higher ground clearance than the standard V70. Distinctive alloy wheels, power from the proven 5-cylinder 2.4 liter engine with low pressure turbocharger, and 5-speed electronically controlled automatic transmission with Geartronic sequential shifting make the V70 AWD a compelling package. Upgraded standard equipment on all V70 models and new available features add value to one of the most popular Volvo automobiles. Major technical specifications remain the same.

- Revised Volvo Navigation System (see S60)
- Revised engine management system in 2.4 and T5
- Sunroof is standard for 2.4T, AWD, and T5
- Stability Traction Control (STC) for 2.4, 2.4T
- Dynamic Stability Traction Control (DSTC) for T5, with 2.4T and AWD starting January 2002
- Enhanced traction control in STC and TRACS systems
- Available Versatility Package with dual child booster seats and folding table
- Standard CD player for T5
