

Johan Häger appointed CEO of Aloi AI

Aloi AI, an innovative legaltech and AI company in the Nordic region, appoints Johan Häger as new CEO. Johan Häger is leaving the law firm Roschier, where he has been a partner and Head of Finance & Restructuring.

Aloi AI offers a platform for law firms and banks to streamline work processes in complex contracts and transactions, from first draft to final documentation. What sets Aloi AI's product apart is its ability to automate complete contract flows based on the customer's entire knowledge base, complete documentation and know-how, in a secure and controlled way, with the highest legal standards.

Johan Häger is now leaving his role as Partner at the law firm Roschier for the role of CEO at Aloi AI.

"Roschier has been a fantastic journey and I am proud of what we have built together – a top class agency, both in the Nordic region and on the international arena. Yet the time has come for me to take the next step. We are facing a paradigm shift where those who embrace AI correctly will not only streamline their businesses, but also redefine what it means to be an advisor in a digital age. With Aloi AI, I see a unique opportunity to drive this transformation for real," says Johan Häger, incoming CEO of Aloi AI.

With Roschier as an initial partner, Aloi AI has been able to ensure an offer adapted to real needs that meets high standards of user-friendliness and business value. A partnership that is strengthened when Johan Häger takes over as CEO, based on the trust and quality that Aloi AI offers.

"We are proud of Johan's contribution to Roschier and the strong position we have today. Although we will miss him, we look to his new role with excitement. Innovation and technology development is crucial to our industry, and an area we are actively investing in to deliver even greater value to our clients. We look forward to continuing our collaboration with both Johan and Aloi AI," comments Johan Sidklev, Managing Partner at Roschier.

"Bringing in Johan Häger as CEO is proof of Aloi AI's potential and position. The fact that he, with his unique experience, deep understanding of the industry and his broad network, now chooses to take the step from law firm to tech startup shows the development of the market and the need for our services," says Carl Zetterqvist, President of Aloi AI.

Aloi AI was founded in early 2024 and has since developed its AI-based platform to fundamentally streamline legal work processes, in collaboration with Roschier. Today, the company employs 30 people, and is backed by Erik Engellau-Nilsson, CEO of Norrsken Launcher, Fredrik Jung-Abbou, co-founder of Norrsken Launcher, Kry and Lendo, Fredrik Hjelm, founder and CEO of Voi Technology, and Johan Karlsson, co-founder and CEO of Slättö Förvaltning and Neptunia Invest.

Johan Häger assumed the role of CEO of Aloi AI on April 28.
