<sup>1</sup> Measured as profitability from operating activities, excluding amortization and impairment of acquisition-related intangible assets without the impact of items affecting comparability between periods. <sup>2</sup> Earnings per share (EPS) has been calculated based on 20 000 000 shares, corresponding to the number of shares in the parent company Terranor Group AB. The same number of shares has been applied for the comparable periods to ensure consistency.

## Significant events during the quarter

- Terranor won a public tender with Tonder Municipality in Denmark worth MSEK 270 over four years.
- Terranor won a sweeping contract in Velje Municipality worth MSEK 36 over four years and was granted an option by the Swedish Transportation Administration for road safety in Southern Sweden worth MSEK 20 running until March 2027.

## Fourth quarter 2025

- Revenue growth amounted to 29 percent (8)
- Adjusted EBITA increased to 48.2 MSEK (45.9)
- Adjusted operating cash flow increased to 210.5 MSEK (124.9)
- Revenue increased to 1 223.2 MSEK (947.2)
- EBITA decreased to 39.1 MSEK (39.2)
- Operating profit (EBIT) amounted to 36.6 MSEK (36.6)
- Profit for the quarter decreased to 7.6 MSEK (44.7)
- Earnings per share amounted to 0.38 SEK (2.24)

## Full year 2025

- Revenue growth amounted to 14 percent (14)
- Adjusted EBITA increased to 98.1 MSEK (89.5)
- Adjusted operating cash flow increased to 302.8 MSEK (149.9)
- Revenue increased to 3 602.6 MSEK (3 146.9)
- EBITA decreased to 25.7 MSEK (76.5)
- Operating profit (EBIT) decreased to 15.5 MSEK (65.9)
- Profit for the period decreased to -23.1 MSEK (62.1)
- Earnings per share amounted to -1.16 SEK (3.1)
- The Board of Directors proposes a dividend of 1.50 SEK (-) per share

## Significant events after the period

- In January 2026, Terranor AB won a contract for road maintenance in Stockholm worth MSEK 33 over two years, a public tender with Skellefteå Municipality worth MSEK 224 over four years and two municipality contracts in Helsingborg worth MSEK 105 over three years. In February 2026, Terranor AB won a collaboration agreement in two phases for road maintenance in Sundsvall with an estimated value of MSEK 540 over six years.

# High growth with strengthened underlying profitability

## Strong revenue growth and improved cash generation

Terranor concluded 2025 with a strong fourth quarter, confirming the development seen throughout the year. Revenue for the quarter increased to 1,223 MSEK (947), driven by high activity levels across our operations, primarily in Sweden. Adjusted EBITA amounted to 48.2 MSEK (45.9), and cash generation improved significantly, supported by higher activity. Order intake in the fourth quarter amounted to 399 MSEK, with full-year order intake of 2,801 MSEK (1,680). The strong order intake reflects the competitiveness of our offering and supports continued growth and visibility going forward.

We have combined high growth with strengthened underlying profitability and improved cash flow. Together with strong order intake the fourth quarter concludes a year with improvements and increased activity across the business. In a year when significant attention and resources were dedicated to completing a successful IPO this result reflects the collective effort and ability of our organization.

## Strong performance in Sweden confirms our strategy

Sweden continues to be the foundation of Terranor's business and the clearest proof that our strategy delivers as intended. All key operational and financial indicators are developing in the right direction.

Road operations and maintenance business performed strongly during the quarter, supported by high activity in state and municipal contracts and favourable winter conditions that enabled extended work and additional assignments. Excluding underperforming subsidiaries Norvia and Infra, the Swedish operations show very strong profitability, which confirms the strength of our contract portfolio and operational execution. Our focus remains on maintaining this performance over time through disciplined execution. At the same time, we remain cautious in our assessment and continue to focus on sustainable performance over time.

The Swedish operations have demonstrated the ability to absorb higher volumes within existing contracts while also winning new ones, thereby increasing market share. This is driven by competent and professional delivery, as well as higher ambitions among our largest customers, who are investing more to secure higher quality outcomes. The performance in the fourth quarter confirms the trend seen throughout the year.

## Proactive and transparent approach with focus on long-term improvement in Finland

In Finland, revenue was broadly in line with the previous year, while profitability remained under pressure. Operations were affected by state contracts with high material-cost ratios and ceiling-price mechanisms, as well as reduced extra works compared to last year. The majority of the pressure relates to state contracts awarded during 2021–2023. These contracts run over five years, and the effects are expected to materialise gradually over the period 2026–2028. With management being more operationally involved in the last quarter we have also taken on a more proactive standpoint towards our clients to clarify our interpretation on how prices should be adjusted according to the mechanisms in the contract.

During the year, we continued to restructure the Finnish operations, with a focus on reducing overhead, strengthening cost control, and improving the contract portfolio over time. While the short-term outlook remains challenging, these measures are aimed at creating the conditions for improved profitability in the longer term.

## Execution according to plan in Denmark

In Denmark, 2025 developed according to plan. All five expiring state contracts were closed by year-end, with a strong joint focus on ensuring that all commitments were fulfilled with good quality and within the contractual framework. Activity levels were high, although largely within contracted scope and with limited extra works, which affected margins.

Revenue remained at a good level, and profitability developed in line with the contract conditions. With four new state contracts and additional municipal contracts starting in January 2026, Denmark enters a new phase. Under the new contractual framework, we expect profitability to gradually improve during 2026 as activity increases, while acknowledging that the first quarter is traditionally a period of lower activity.

## Focused offering in a stable market

Demand for safe and sustainable roads remains strong across our markets. Terranor's specialization in road operations and maintenance, combined with disciplined execution and high-quality delivery, continues to support a strong competitive position.

With the fourth quarter confirming the trends seen throughout 2025, Terranor enters 2026 with strong momentum in the core business, a solid order backlog, and improved cash flow. The actions taken during the year, both operationally and structurally, support continued development in line with our strategy.

I would like to thank all our employees across Sweden, Finland, and Denmark for their professionalism and commitment. Their collective efforts ensure safe and open roads across the Nordic region and form the foundation of Terranor's continued progress.

CEO Terranor Group  
Michael Berglin

# Terranor at a glance

## Financial targets

### Growth >8%

Achieve an average annual revenue growth of at least 8% in the medium term

### Profitability >5%

Reach an adjusted EBITA margin of more than 5% in the medium term

### Leverage <2.5x

Net debt / LTM adjusted EBITDA should not exceed 2.5x

### Dividend ≥50%

Target to distribute at least 50% of consolidated net income

Terranor is one of the leading players in road operations and maintenance in the Nordic region. The Company's business concept is to offer a wide range of qualified services in road operation and maintenance to ensure that roads remain accessible and functional all year round.

The business covers both winter road operations and maintenance, with snow removal and friction, and summer maintenance, such as repairs and asphalt work. In addition, Terranor offers services in green area management, road safety and light infrastructure projects.

Terranor is the only major private player specialized in road operations and maintenance in the Nordic region, which provides competitive advantages in the tender procedures. Terranor currently operates in the Swedish, Finnish, and Danish markets, which are characterized by high stability, significant growth drivers, and high barriers to entry. The market for road infrastructure services is stable and generally supported by long-term structural trends.

## Terranor's markets

The market in which Terranor operates can be divided into two main areas: road operations and maintenance, together with light infrastructure, light construction, and other adjacent areas such as green construction and maintenance, and standalone temporary road safety services. Terranor has implemented a strategy tailored to the conditions in each geographical market and local area, to better adapt to the specific market conditions in each country and region where it operates.

Road operations and maintenance

Light construction

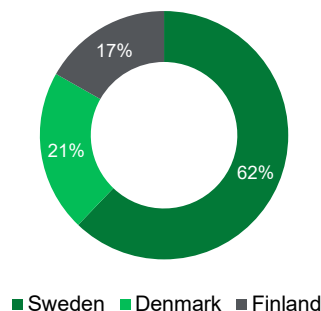

Green construction and maintenance

Temporary road safety services

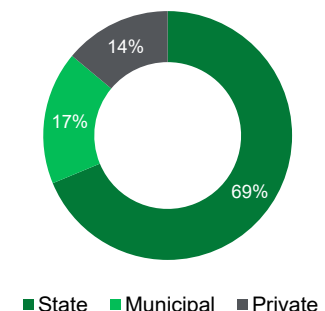

## Terranor's customer base

Terranor's customers are found in both the public and private sectors, but the vast majority of Terranor's revenues comes from government and municipal clients. The Company works with long-term contracts, in general between four and eight years, which provide stable revenue streams with low risk and good visibility. Terranor's diligent tender strategy has contributed to a revenue growth rate, that by far surpasses the market focusing on profitable contract wins.

Revenue by country as per 2025

Revenue by customer group as per 2025

# Group performance

## Revenue

The revenue for the quarter was 1 223.2 MSEK (947.2 MSEK), representing a 29 percent increase compared to the same period last year. For the full year 2025, revenue totaled 3 602.6 MSEK (3 146.9 MSEK), an increase of 14 percent, which exceeds our annual growth target in the medium term. Growth was driven primarily by increased operational activity in connection with the state contracts and by higher levels of extra works across Sweden and Denmark. Favourable winter conditions prolonged the work season, allowing the teams to finalise extended scope of work. Full-year revenue reached 3 602.6 MSEK (3 146.9 MSEK), up 14 percent, exceeding the Group's medium-term growth target.

## Adjusted EBITA

Adjusted EBITA for the quarter amounted to 48.2 MSEK (45.9), reflecting an increase of 5% compared to the same quarter last year. For the full year 2025, the adjusted EBITA was 98.1 (89.5), an increase of 10 percent. The adj. EBITA margin was 4 % (5) for the quarter and 3% (3) the full year 2025, which is below our financial target of 5 % in the medium term. The group's adjusted EBITA is stable for the full year 2025. Items affecting comparability for the quarter amounted to 9.2 MSEK (6.7) and for the full year 2025 72.4 MSEK (13.0), driven by restructuring costs and IPO-related costs.

## Operating profit

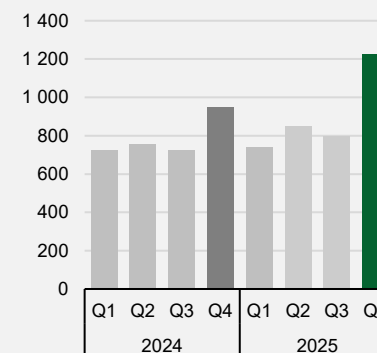

The operating profit for the quarter was 36.6 MSEK (36.6 MSEK). For the full year 2025, operating profit was 15.5 MSEK (65.9 MSEK), due to higher non-recurring items related to the IPO process and lower profitability in specific subsidiaries.

## Profit

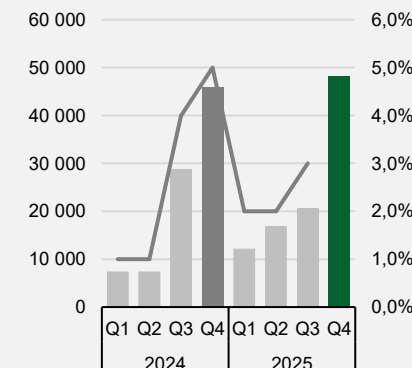

The profit for the quarter was 7.6 MSEK (44.7), a decrease of 37.1 MSEK from the same period last year. A deferred tax income was recognized on losses carried forward in the fourth quarter 2024, which has partly been reversed in the fourth quarter 2025.

For the full year 2025, profit was -23.1 MSEK (62.1). The decrease was mainly due to higher non-recurring items related to IPO process. There was also an increase in tax expense as deferred tax assets on losses carried forward were reversed in 2025.

# Financing and Cash Flow

## Leverage

Leverage ratio, measured as Net debt divided by LTM Adjusted EBITDA, was -1.50x (-1.62), remaining stable and comfortably below the target of less than 2.5x. The improvement compared to last year was driven by stable underlying operating performance, lower net financial debt, and a solid contribution from working-capital optimisation during the fourth quarter. The Group's capital structure remains robust, providing financial flexibility to support ongoing operational initiatives and future investment needs.

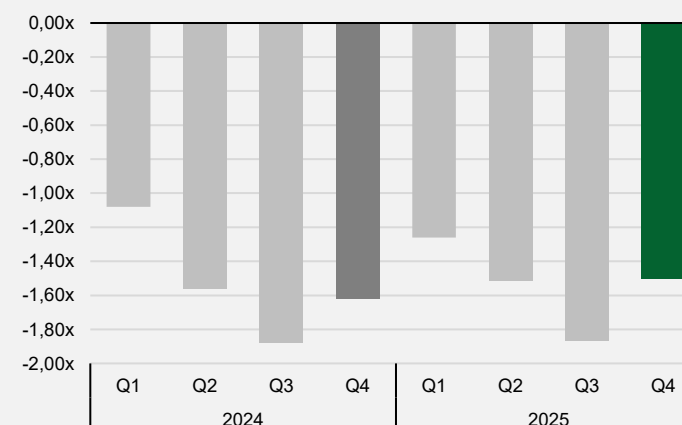

## Cash Flow

Operating cash flow after changes in working capital was strong in the fourth quarter, amounting to 201.1 MSEK (112.5). The increase was mainly driven by high operational activity in combination with solid earnings and strengthened operational cash management that allowed for a significant release in trade working capital and improved balance between contract assets and liabilities. For the full year, operating cash flow amounted to 213.9 MSEK (110.0), demonstrating consistent improvements in working-capital management across the Group

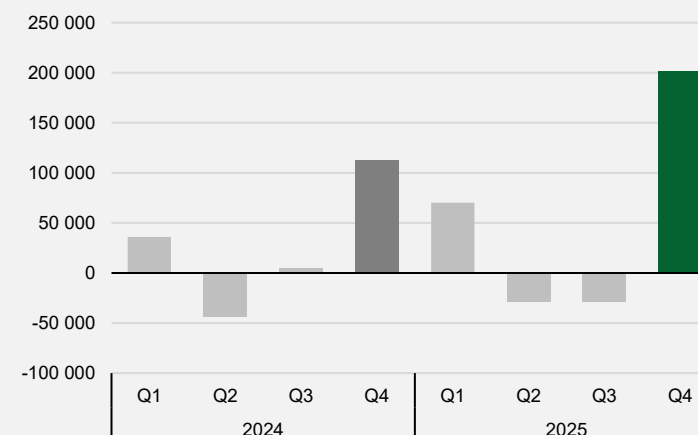

Cash flow from investing activities for the quarter amounted to 4.1 MSEK (-6.6), driven by lower capital expenditure. For the full year 2025, cash flow from investing activities amounted to -6.5 MSEK (-27.2), reflecting prudent capital allocation and fewer large equipment purchases.

Cash flow from financing activities for the quarter amounted to -144.9 MSEK (-97.4), largely reflecting lease-related payments and reductions in bank liabilities. For the full year 2025, cash flow from financing activities amounted to -173.6 MSEK (-67.8), driven by scheduled lease payments and continued reduction of interest-bearing liabilities.

kSEK

## Segment – Sweden

### Revenue 788.7 MSEK (533.5)

The revenue increase was driven by strong activity in State and Municipality contracts and the completion of substantial amount of extra works toward the year-end. Terrano AB delivered robust volumes supported by favourable weather conditions, which extended the operating season and extra works to be completed.

Year-on-year growth amounted to 22%, driven by strong performance in state and municipal contracts. Sweden remained the principal growth engine, supported by solid underlying margin performance in Terrano AB. Losses in Norvia and Infra were the main negative deviations; however, corrective actions have been implemented. A strong volume of additional works, particularly in Q4, helped offset the weaker performance in these subsidiaries.

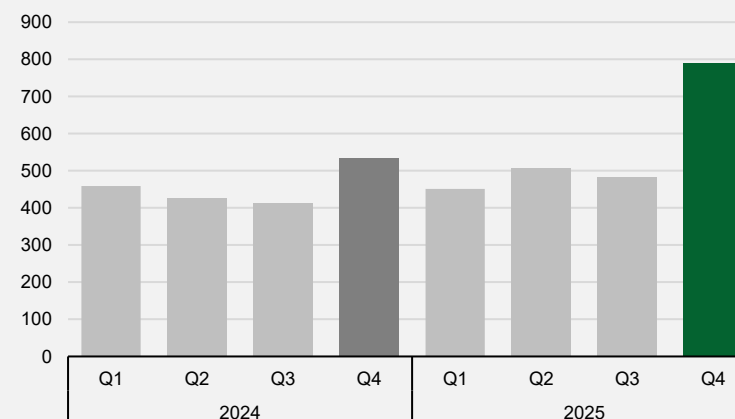

### Adjusted EBITA 43.2 MSEK (24.8)

Adjusted EBITA showed strong underlying performance, supported by robust activity in State and Municipality contracts and the continued momentum in Terrano AB. Terrano AB delivered solid margins throughout the quarter, confirming the strength of its contract portfolio and operational execution. Although Norvia and Infra continued to weigh on profitability, the positive contribution from the core operations in Sweden more than offset part of this impact.

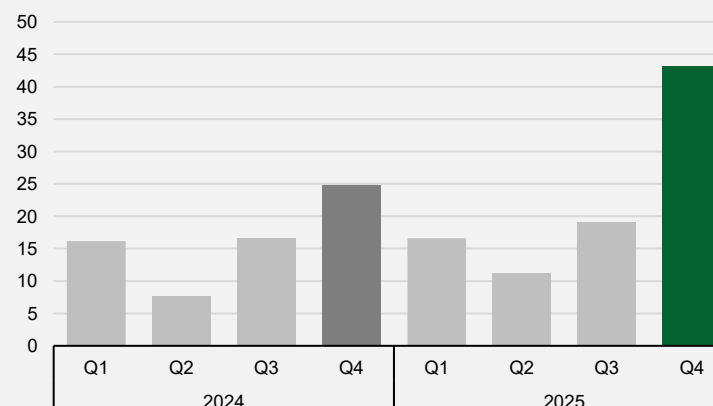

Amounts in kSEK	Oct-Dec		%
	2025	2024

Adjusted EBITA	89 842	65 322	38%
Adjusted EBITA margin	4%	4%	0 p.p.

Revenue per quarter, MSEK

Adj. EBITA per quarter MSEK

## Segment – Finland

### Revenue 204.8 MSEK (205.8)

Revenue was in line with previous year, while operations continued to experience pressure from state contracts with high material-cost ratios and ceiling-price constraints. Increased volume in municipal agreements compensated for the lower volume of extra works. Full year revenue increased by 9% year-on-year. Finland continues to operate under pressure due to unfavourable long-term state-contract economics. Profitability deteriorated significantly year-on-year despite stable revenue, primarily due to risk provisions. Several restructuring initiatives were implemented in 2025.

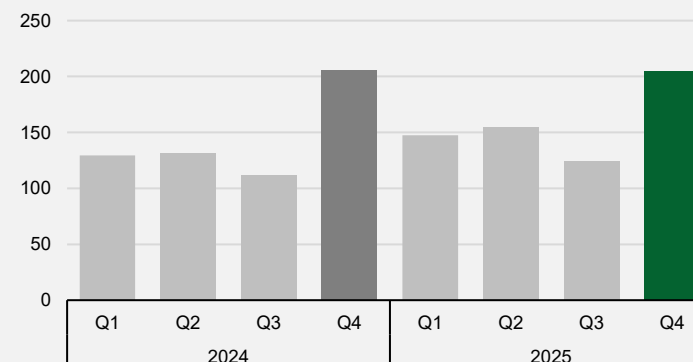

### Adjusted EBITA 2.3 MSEK (7.7)

Adjusted EBITA decreased compared mainly due to lower profitability in extra works and risk reservations in state contracts, which led to weaker EBITA contribution year-on-year.

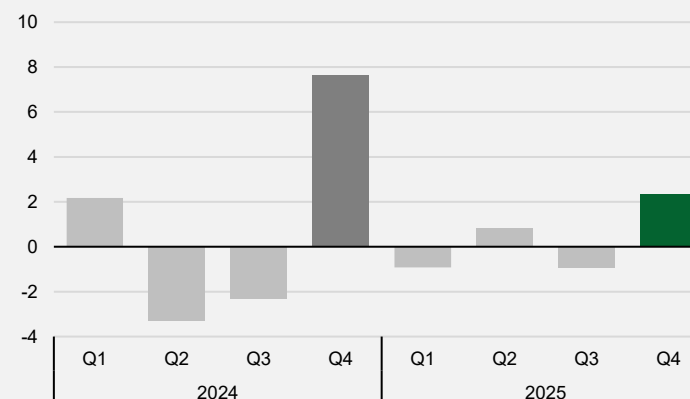

Amounts in kSEK	Oct-Dec		%
	2025	2024	
Revenue	204 827	205 786	-0%
Adjusted EBITA	2 325	7 650	-70%

Adjusted EBITA	1 316	4 220	-69%
Adjusted EBITA margin	0%	1%	-1 p.p.

Revenue per quarter, MSEK

Adj. EBITA per quarter MSEK

## Segment – Denmark

### Revenue 230.4 MSEK (208.6)

Revenue increased during the quarter, supported by strong activity in sweeping operations, municipality contracts, and year-end volumes related to closing of state contracts. Year-on-year growth was 1%. Denmark delivered stable operational execution, with solid revenue but weaker profitability due to lower margins on ending state contracts and limited volumes of additional works towards year-end 2025. Margin improvement is expected in 2026 as four new state contracts commence under improved conditions.

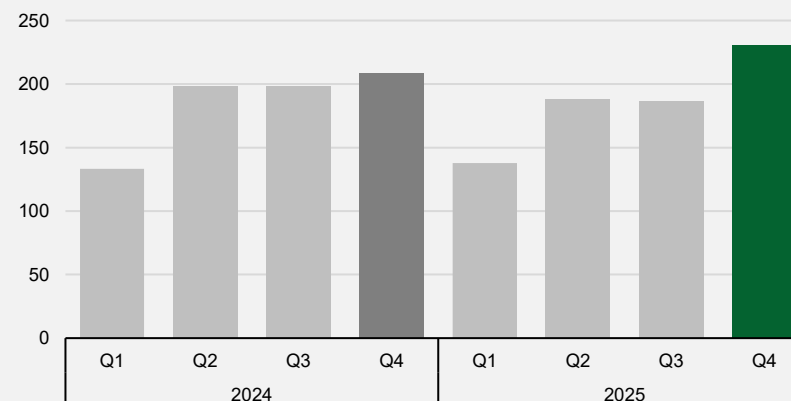

### Adjusted EBITA 4.6 MSEK (13.2)

Adjusted EBITA decreased despite good activity levels and solid revenue performance toward year-end. While operations contributed to higher volumes, profitability was adversely affected by lower margins in ending state-contract due to lack of extra works. As a result, the segment delivered a lower Adjusted EBITA outcome compared to previous year, although operational execution remained stable and the underlying platform is stronger heading into 2026.

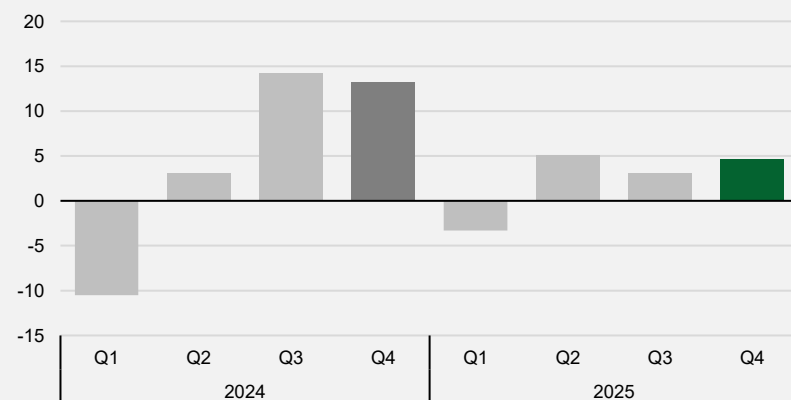

Amounts in kSEK	Oct-Dec

## Other information

### The Terranor Share

Terranor Group AB (publ)'s share has been listed on Nasdaq First North Premier segment since 30 June 2025. The stock is traded with the ticker or short name TERNOR. Terranor's Certified Adviser is DNB Carnegie Investment Bank AB. The closing price of the Terranor share on the last trading day in the period was SEK 28.40. Average number of outstanding shares for the quarter amounted to 20 000 000 (0) and for January–December to 15 125 000 (0).

### Related Parties

The Group have had costs amounting to Mutares SE & Co. KGaA ("Mutares") of 0.6 MSEK (3.3). The Group has purchased services from Mutares in the form of management fees and other advisory services. There have not been any transactions with related parties.

### Environmental, social and governance

Terranor ensures ethical behavior, fair working conditions, and compliance through its Code of Conduct, which includes guidelines on business ethics, human rights, anti-corruption, health and safety, environmental responsibility, and against discrimination and harassment. Breaches may result in disciplinary action. Annual salary surveys ensure fair remuneration, and the Group complies with relevant labor laws. No one under 16 is employed, and subcontractors must have union agreements or approval via form UE 2021. During projects, everyone at construction sites wears ID06 and is registered electronically.

The Compliance and Ethics Committee, consisting of supervisors and management representatives from HR, Compliance, and Legal, meets quarterly to uphold high ethical standards and address compliance incidents promptly. Terranor's supplier policy sets sustainability and ethics requirements within the supply chain. The company promotes an inclusive and safe workplace founded on honesty, respect, trust, and progress. It aims for long-term environmental sustainability by complying with laws and regulations, taking preventive measures, and making ongoing improvements.

High ethical standards guide employees' decisions, ensuring clarity when raising concerns.

Occupational safety is a priority, aiming for zero accidents through hazard elimination, risk reduction, and continuous training. Regular audits and inspections monitor safety efforts. Terranor's Code of Conduct outlines expectations for ethical behavior and social responsibility, supported by risk analyses in health and safety.

### Parent Company

The parent company undertakes no business activities on its own. Further, the parent company owns and manages the subsidiaries within the group.

### Employees

At the end of the period, the Group had 682 (611) employees, out of which 139 are women and 543 are men. The company's operations are based on successful tendering, effective site setup, and profitable contract execution. It uses structured frameworks to ensure ongoing skill development and operational excellence throughout the organization.

### Seasonal effects

Terranor is impacted by seasonal variations due to weather conditions. Earnings in the first quarter are normally weaker than the rest of the year.

### Significant Risks and Uncertainties

Terranor's results, financial position, and cash flow are affected by both external changes and the Group's own actions. The purpose of risk management is to identify and analyse the risks the company faces and, as far as possible, to prevent and limit any potential negative effects. Terranor's operations are influenced by macroeconomic factors such as economic downturns, inflation, political uncertainty, which can reduce demand and affect revenues. Material costs and external disruptions also impact profitability and operations. Terranor relies on a strong supply chain; delays or price increases in materials and logistics pose risks to project execution and cost structure. Weather and seasonal variations

significantly influence operational planning and financial performance. Operating in Sweden, Denmark, and Finland, Terranor must comply with various regulations. Misapplication can result in legal disputes, fines, and lost contracts. Regulatory changes can impact competitiveness and operational costs. Terranor faces tax risks across jurisdictions, including surcharges, transfer pricing issues, and tax audits. Contractual obligations carry potential legal risks, with failure to meet terms leading to disputes and contract terminations. Through its operations, Terranor is exposed to various types of financial risks: credit risk, market risks (interest rate risk, currency risk, and other price risk), as well as liquidity risk and refinancing risk. These risks may adversely affect Terranor's financial stability and long-term growth prospects.

In Finland, Terranor continues to face material ceiling price risk in several long-term state contracts. Contract period is five years and Terranor currently has affected contracts that expires 2026 to 2029 with a majority of contracts expiring 2027 and 2028. Contracts include pricing mechanisms with a ceiling that due to various conditions and mechanisms will fluctuate over the contract period. If cost is still exceeding the specific ceiling at the time of contract expiration, then this needs to be reimbursed by Terranor.

As cost inflation and higher prices have persisted, several contracts have already significantly surpassed the approved ceiling price level. If Terranor can't compensate for this it represents a significant financial risk, as further cost increases could negatively impact revenue recognition and profitability and potentially eradicate the equity of Terranor Oy. Terranor has several mitigating actions ongoing, including a legal claim towards the clients regarding demands for additional compensation that substantially supersedes the risk mentioned above.

The recognition of these contracts in this report has been carried out in accordance with Note 2 – Accounting Principles, which outlines the estimates and assumptions impacting the reported revenue amounts. The current period's reporting

reflects the required assessments under the Group's accounting principles, including timing and measurement of revenue associated with these contracts. Due to the complexity of these contracts, there is potential for varying interpretations, which may affect the timing and measurement of revenue recognition.

Connected to the above, Terranor Finland is involved in an ongoing legal dispute related to the interpretation and execution of contractual terms, primarily concerning how ceiling prices should be calculated for example in the case of unforeseen events as the war in Ukraine. While the dispute remains unresolved, it has the potential to introduce financial and operational uncertainty depending on the final outcome.

Together, the ceiling price exposure and the pending legal dispute represent significant risk factors for the Finnish operations and the potential range of impact remains broad reflecting uncertainties tied to future cost developments, the resolution of the pending dispute, and potential changes in the interpretation of contract terms. Terranor continues to scope this exposure through scenario modelling, sensitivity analyses, and ongoing contract level reviews to capture both short term and multi year downside risks. Management continues to monitor the situation closely and has taken steps to strengthen internal processes, improve contract governance, and ensure compliance with regulatory and contractual frameworks.

As clarity emerges, the Group will reassess the magnitude and duration of the exposure and will reflect any required adjustments in subsequent reporting periods in accordance with the established accounting principles.

**Profitability Pressure:** The Group has experienced declining profitability among certain subsidiaries in Sweden. This trend may continue if restructuring efforts do not yield expected results.

**Restructuring Risks:** Finland and Terranor Norvia AB in Sweden are undergoing restructuring. These changes aim to reduce overhead and improve profitability but may involve transitional inefficiencies or reputational impact.

Exchange differences	-1 267	168	-2 278	924
<b>Cash and cash equivalents at the end of period</b>	<b>76 734</b>	<b>45 292</b>	<b>76 734</b>	<b>45 292</b>

A minor adjustment has been made on how translation differences are presented in the cash flow. The comparative figures have been restated, but the effect is deemed to be immaterial.

## Note 1 General information

This interim report covers the Swedish parent company Terranor Group AB (publ.), company registration number 559525-3732 and its subsidiaries. The headquarter is located on Björnstigen 85, 179 73, Solna, Sweden. Terranor is a leading operations and maintenance service provider for road infrastructure in the Nordics.

## Note 2 Accounting principles

The interim report for the Group has been prepared in compliance with IAS 34 Interim Financial Reporting and applicable sections of the Swedish Annual Accounts Act (1995:1554). The interim report for the parent company was prepared in accordance with the Annual Accounts Act, Chapter 9 Interim Financial Reporting, and recommendation RFR 2 Accounting of Legal Entities issued by the Swedish Financial Accounting Standards Council.

The accounting principles applied in this interim report are consistent with the accounting principles presented in note 2 of the Historical Financial Information for the financial years 2024, 2023, and 2022, which are an integral part of the prospectus. All amounts are stated in millions ("MSEK") or thousands ("kSEK") of Swedish kronor unless otherwise specified. Rounding differences may occur.

Disclosures as required under IAS 34.16A are presented in the financial statements and associated notes in the interim information on pages 16-21, which constitute an integrated part of this financial report.

## Note 3 Significant estimates and judgements

Preparation of the financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the recognized amounts of assets, liabilities, revenues, and expenses, as well as related disclosures. In applying the Group's accounting principles, management makes various judgments that can significantly affect the amounts reported in the financial statements. The uncertainties in estimates and assumptions relating to future periods may have a significant risk of a significant adjustment to the recognized values of assets and liabilities during the upcoming fiscal year.

Judgments and estimates are continuously evaluated and are based on historical experience and expectations of future events that are considered reasonable under current circumstances. Changes in estimates and judgments are recognized in the period in which the change is made if the change only affects that period, or in the period in which the change is made and future periods if the change affects both the current period and future periods.

The same estimates and judgments have been made in this report as presented in note 3 of the Historical Financial Information for the financial years 2024, 2023, and 2022, which are an integral part of the prospectus.

## Note 4 Operating segments

Terranor operates under a decentralized model where each country functions as a separate component and is monitored individually. Accordingly, the Group's segments consist of the three countries: Sweden, Finland, and Denmark, which also represent the geographical areas in which the Group operates. As a result, no aggregation of segments has been deemed necessary. The Chief Operating Decision Maker (CODM), who in Terranor is the Group CEO, reviews and allocates resources based on the performance measure adjusted EBITA. This performance measure also serves as the segment measure for the Group.

## Calculation formulas for financial performance

Alternative performance measure	Definition	Reason for use of measure
Revenue growth (%)	Revenue for the period compared to revenue for the comparative period.	Used to show the change in revenue between periods.
EBITDA	Operating profit (EBIT) after reversal of depreciation, amortization and impairment losses on tangible and intangible assets and right-of-use assets.	Used to measure operating profitability excluding depreciation, amortization and impairment. Complementary to assessing the operating performance of the business.
EBITDA margin (%)	EBITDA as a percentage of revenue.	Used to measure the development of the profitability ratio from operating activities excluding depreciation, amortization and impairment.
Adjusted EBITDA	EBITDA adjusted for items affecting comparability.	Used to measure the profitability of operating activities (excluding depreciation, amortization and impairment) without the impact of items affecting comparability between periods. Complementary to assessing the adjusted operating profit of the business.
Adjusted EBITDA margin (%)	Adjusted EBITDA as a percentage of revenue.	Used to measure the development of the profitability ratio from operating activities excluding depreciation, amortization and impairment losses without the impact of items affecting comparability between periods.
EBITA	Operating profit (EBIT) after reversal of amortization and impairment of intangible assets related to business combinations.	Used to measure operating profitability excluding amortization and impairment of acquisition-related intangible assets. Complementary to assessing the operating performance of the business.
EBITA margin (%)	EBITA as a percentage of revenue.	Used to measure the development of the profitability ratio from operating activities excluding amortization and impairment losses from acquisition-related intangible assets.
Adjusted EBITA	EBITA adjusted for items affecting comparability.	Used to measure profitability from operating activities, excluding amortization and impairment of acquisition-related intangible assets without the impact of items affecting comparability between periods. Complementary to assessing the adjusted operating profit of the business.
Adjusted EBITA margin (%)	Adjusted EBITA as a percentage of revenue.	Used to measure the development of the profitability ratio from operating activities, excluding amortization and impairment losses from acquisition-related intangible assets, without the impact of items affecting comparability between periods.
Operating profit (EBIT)	Profit for the period after adding back tax on profit for the period and financial expenses and deducting financial income.	Used to measure operational profitability.
Operating margin (%)	Operating profit as a percentage of revenue.	Used to show the operational profitability ratio.
Adjusted EBIT	EBIT adjusted for items affecting comparability.	Used to measure operating profitability without the impact of items affecting comparability between periods.
Adjusted EBIT margin (%)	Adjusted EBIT as a percentage of revenue.	Used to show the operating profitability ratio without the impact of items affecting comparability between periods.
Items affecting comparability	Refers to events that are material in nature and considered important to specify because they are considered to affect comparability between periods.	Used to provide users of the financial statements with an understanding of the Company's performance between periods without the impact of items considered to affect comparability between periods.
Net cash (+) / Net debt (-)	Refers to non-current and current liabilities to credit institutions, non-current other interest-bearing liabilities, non-current and current lease liabilities less cash and cash equivalents.	Used to monitor the evolution of debt and the size of refinancing needs. As cash can be used to pay off debt at short notice, net debt is used as a measure of total debt financing.
Net debt / adjusted EBITDA ratio, rolling twelve months	Net debt divided by adjusted EBITDA rolling 12 months.	Used to demonstrate the Group's ability to repay its financial liabilities related to its operating activities.
Working capital	Current assets consist of current tax receivables (included in other current receivables) and cash and cash equivalents, less current liabilities excluding current tax liabilities, current liabilities to credit institutions, current lease liabilities, and current provisions.	Used to measure the current financial status of the Group.

Working capital / revenue rolling twelve months (%)	Working capital as a percentage of revenue rolling 12 months.	Used to show the Group's working capital over time.
Investment in tangible and intangible assets	Expenditure on acquisitions and investments in the Group's tangible and intangible assets.	Used as a measure of the Group's historical capital expenditure and used as an input to calculate Adjusted operating cash flow and Cash generation.
Adjusted operating cash flow	Adjusted EBITDA less investments in tangible and intangible assets adjusted for changes in inventories, accounts receivable, other current receivables (excluding current tax receivables), accounts payable, other current liabilities, and accrued expenses and prepaid income.	Used to show the underlying cash flow generated from the adjusted operating activities.
Cash generation (%)	Adjusted operating cash flow in relation to adjusted EBITDA.	Used to indicate the ratio of operating profitability from the business without the impact of items affecting comparability between periods, converted to cash flow.
Capital employed	<p>Total assets excluding goodwill and other intangible assets related to operating activities, less non-interest-bearing liabilities and deferred tax liabilities.</p> <p>Non-interest-bearing liabilities comprise other non-current liabilities, current tax liabilities, other current liabilities, accrued expenses and prepaid income and provisions.</p>	Used as a measure to show the Group's capital tied up in operations used to generate revenue.
Average capital employed	Average capital employed refers to the average of the capital employed for the current quarter and the capital employed for the previous four quarters.	Used to understand the Group's return on capital employed, taking into account an average of capital employed.
Return on capital employed (%)	Adjusted EBITA as a percentage of average capital employed.	Used to understand how well the company uses its capital to generate returns.
Average equity	Average equity refers to the average of closing equity for the current quarter and closing equity for the previous four quarters.	Used to understand the Group's return on equity, taking into account an average of equity.
Return on equity (%)	Profit for the period as a percentage of average equity.	Used to measure how effectively shareholders' invested capital is generating returns.
Net debt/equity ratio (%)	Represents net debt as a percentage of equity.	Used to show the relationship between debt and equity.
Order intake	Value of projects obtained, excluding changes in existing projects during the current period.	Order intake provides an indication of revenue development in the short to medium term.
