

Terranor wins operation and maintenance contract in Väsby worth SEK 272 million

8 April 2026

Trafikverket (the Swedish Transport Administration) has announced its intention to show continued confidence in Terranor AB, a subsidiary of the Terranor Group, by awarding a public tender for operation and maintenance of state roads for an additional four years in Väsby, Sweden. The agreement is valued at approximately SEK 272 million for the full contract period. The contract will commence on 1 September 2026 and run until 31 August 2030, with an option to extend the contract by up to two additional years.

The Väsby operational area is one of the country's busiest stretches of road and places high demands on rapid response, technical expertise and high availability. The area is located in proximity to existing operations and cover areas with high traffic intensity, including major European routes and key transport corridors. By focusing on large, high-traffic contracts that are closely connected geographically, Terranor enhances operational efficiency, resource utilisation and service delivery.

"We are pleased that the Swedish Transport Administration has entrusted us with continuing to operate the Väsby operational area, one of the most traffic-intensive in Sweden. This is a testament to Terranor's high standards, expertise and sense of responsibility, and we look forward to continuing to work with our colleagues to ensure that the roads remain safe and passable 24 hours a day, all year round, regardless of weather conditions and traffic volumes", says Henrik Jonsson, Operations Manager, Region Mitt at Terranor AB.

In accordance with customary procurement procedures, a mandatory standstill period of 10 days will apply before the contract can be formally signed.
