

# Terranor wins two contracts worth SEK 36 million for road adjacent water, drainage, and ventilation systems

16 April 2026

Trafikverket (the Swedish Transport Administration) has announced its intention to show continued confidence in Terranor AB, a subsidiary of the Terranor Group, by awarding a contract the operation and maintenance of road adjacent water, drainage and ventilation systems in southern Sweden, covering Skåne, Blekinge, Kronoberg County and Kalmar. In addition, Terranor AB has also won an equivalent contract in eastern Sweden, covering Jönköping and Östergötland County. The contracts have a combined value of approximately SEK 18 million per year and run from 1 May 2026 to 30 April 2028, with options for a further four years.

The contracts cover the operation, preventive and corrective maintenance, as well as minor reinvestment measures for technical installations related to water and drainage. This includes rest area facilities, as well as pumps and systems that are part of road and rail drainage, used to remove water from ditches adjacent to roads and railways where gravity flow is insufficient.

*“The contracts strengthen Terranor’s position in the technical operation and maintenance of critical infrastructure. The fact that we have once again been awarded the contract in southern Sweden confirms our technical expertise, our ability to deliver high quality over time, and our focus on the reliable operation of critical facilities,”* says Andreas Johansson, Operations Manager at Terranor AB.

In accordance with customary procurement procedures, a mandatory standstill period of ten days will apply before the contract can be formally signed.

**About Terranor**

Terranor is one of the leading players in road maintenance in the Nordic region. The Company’s business concept is to offer a wide range of qualified services in road operation and maintenance to ensure that roads remain accessible and functional all year round. The business covers both winter road maintenance, with snow removal and anti-slip protection, and summer maintenance, such as repairs and asphalt work. In addition, Terranor offers services in green area management, road safety and light infrastructure projects. Through operational efficiency, Terranor has achieved a high and profitable growth.
