Saab selected by Missile Defense Agency for the SHIELD program

Saab, Inc. was awarded a contract for the Missile Defense Agency Scalable Homeland Innovative Enterprise Layered Defense (SHIELD) indefinite-delivery/indefinite-quantity (IDIQ) contract. This contract encompasses a broad range of work areas that allows for the rapid delivery of innovative capabilities to the warfighter with increased speed and agility.

“Saab’s proven systems integration and layered defense capabilities deliver scalable missile defense solutions that directly support the warfighter,” said Erik Smith, President and CEO of Saab, Inc. “By bringing together advanced sensors, command and control, and rapid integration expertise, we execute at the pace the mission demands—helping accelerate capability delivery and stay ahead of evolving and complex threats.”

Saab has extensive experience and knowledge in implementing technologies such as advanced weapons and sensors, artificial intelligence and machine learning, and practices including model-based systems engineering and agile acquisition and development. Saab is building a state-of-the-art munitions facility in the U.S., increasing domestic production capacity for shoulder-launched weapons and precision fire systems.

This award enables Saab to compete for future task orders over the contract’s period of performance. Saab has not received an order or signed a contract for deliveries relating to this program.

Saab is a leading defense and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 27,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defense capability of several nations.

Saab, Inc. is a U.S. based wholly owned subsidiary, delivering advanced technology and systems, supporting the U.S. Armed Forces and the Federal Aviation Administration, as well as international and commercial partners. Headquartered in Syracuse, New York, the company has business units and local employees in ten U.S. locations.
