CEO Letter – MANAGEMENT UPDATE

Dear Shareholders,

In the fourth quarter of 2025, Photocat focused on preparing its de-icing solutions for new market segments. Driven by market demand, we have expanded our capability to deliver both the traditional fluid **Ice & Dust Away** and a solid granulate designed for pavements and similar surfaces. We have successfully procured the production equipment, recipes, and rights for this product line, enabling Photocat to offer a dual de-icing portfolio starting in 2026.

Photocat delivered revenue of DKK 4.5 million in Q4 2025, compared to DKK 3.7 million in Q4 2024. For the full year 2025, total revenue reached DKK 13.7 million, an increase from DKK 12.1 million in 2024.

Quarterly earnings:

- EBITDA for Q4 2025 was DKK 2.0 million, compared with DKK 0.96 million in Q4 2024.
- Net Profit for the quarter reached DKK 1.5 million, a reversal from the DKK 0.7 million loss in the same period last year.
- The full-year Net Profit for 2025 ended at DKK 0.86 million, compared to a loss of DKK 2.5 million in 2024.

Operational Developments

InnoLig™: Following a testing phase, our dust suppressant has secured its first customers in Denmark and Poland. The product was presented together with Essity at the London Build Expo, receiving positive initial feedback from visitors.

Spain: We have initiated a push to capture a larger share of the value chain in the asphalt market. We are building a network to deliver direct offerings to major asphalt contractors to match regional competition.

Technology Licensing: Sales of licenses for photocatalytic water-cleaning technology, developed with Aarhus University, contributed significantly to the quarterly revenue. Conversely, sales of NOxOFF in the Spanish concrete paver and bitumen roofing segments were lower than anticipated.

Thank you for your continued trust and support.

Sincerely,

Michael Humle, Chief Executive Officer, Photocat A/S

ICE & DUST-AWAY.

WHO IS PHOTOCAT A/S

Photocat A/S manufactures patented coating materials for both outdoor and indoor applications with the effect to degrade NOx and VOC's when exposed to light. Both NOx and VOC's are severely damaging to human health. Photocat's patented technology is a very efficient and economically viable alternative to many of the traditional technologies targeting NOx and VOC's.

We also sell and distribute products that reduce air born particles and dust as PM1.0 PM2.5 and PM10. It also acts as a de-icing agent, and an alternative to salt.

Photocat's shares was listed on Nasdaq in Stockholm November 20, 2015, with the ticker symbol PCAT. From August 5, 2025 shares are listed on Spotlight.

This report has not been reviewed by the company's auditor.

The annual report for PHOTOCAT A/S has been presented in accordance with the Danish Financial Statements Act regulations concerning reporting class B enterprises. Furthermore, the company has decided to comply with certain rules applying to reporting class C enterprises.
