## **Xyleme Named A Top 20 Learning Portal Company for Third Consecutive Year**

**Boulder, CO; September 18, 2014** – For the third year in a row, Xyleme, the learning industry’s only single-source content management platform, has been named among TrainingIndustry.com’s 2014 Top 20 Learning Portal Companies.

Xyleme is a secure, scalable, content management system for learning that transforms the way companies manage their content-- letting them author, publish, deliver and measure learning from a *single source* – designed to make high performance organizations more agile.

“We are honored to be a recipient of this award for the third year in a row,” commented Xyleme President & CEO, Mark Hellinger. “It is the depth and breadth of the Xyleme platform that makes it truly transformational for customers. It changes how companies think about learning content and over time, solves many complex issues that are currently stopping them from achieving their goals as a learning organization.”

In a statement released by TrainingIndustry.com, Chief Executive Officer, Doug Harward, said “The Top 20 companies provide technology and services that have a lasting impact on corporate learning. Their ability to personalize the learning environment to both the needs of the learner and the goals of the business give us confidence in the business impact of the programs they support.”

Those interested in seeing the award-winning portal can register for a demo or visit the website at [www.xyleme.com](http://www.xyleme.com). Speak to someone immediately by sending an email to Xyleme’s Marketing Communications Manager, Sarah Danzl.

### **About Xyleme**

Xyleme, Inc. is the leader in standards-based learning content management solutions that enable single-source publishing and personalized delivery of training content. Xyleme's learning platform enables companies to author, manage, publish, deploy and measure learning from the cloud with Xyleme -- the product suite used for XML-based online courseware, instructor-led training and performance support content from any LMS, web portal or mobile device. The built-in “Tin Can” Learning Record Store (LRS) captures all learner activities and includes rich Analytic Dashboards complete with an open API.
