

Press release 17 June 2020

## **Proact launches new managed WAN service**

To help organisations connect data and integrate applications across on-premises, private cloud and public cloud infrastructures, Proact, Europe's leading independent data centre and cloud services provider, has launched a new end-to-end WAN management platform: Wide Area Network as a service (WANaaS).

Proact's WANaaS will support enterprises who are looking to grow their WAN bandwidth and improve their security. Customers pursuing a multicloud strategy can leverage Proact's direct connectivity from its data centres to public clouds, as well as connecting their own sites together under one WAN management platform.

With Proact's WANaaS, customers will gain access to their own real-time portal and can rest assured that connectivity is monitored, managed and supported round-the-clock, all but eliminating any risks from human error, and leaving enterprise IT teams free to focus on IT projects driving business value and innovation.

"Many customers of ours have already taken advantage of a multitude of secure managed cloud services hosted in our data centres, such as backup, DR, Infrastructure as a service and SIEM. With our managed WAN service, customers can also benefit from connectivity across their on-premises, private cloud and public cloud infrastructures, with a single point of contact", says Per Sediñ, CTO and Acting VP, Portfolio & Technology at Proact IT Group AB.

### **About Proact**

Proact is Europe's leading independent data centre and cloud services provider. By delivering flexible, accessible and secure IT solutions and services, we help companies and authorities reduce risk and costs, whilst increasing agility, productivity and efficiency. We've completed over 5,000 successful projects around the world, have more than 3,500 customers and currently manage in excess of 100 petabytes of information in the cloud. We employ over 1,000 people in 15 countries across Europe and North America. Founded in 1994, our parent company, Proact IT Group AB (publ), listed on Nasdaq Stockholm in 1999 (under the symbol PACT).
