FOR IMMEDIATE RELEASE

Wheatland Tube Hires New General Manager for Fence and Galvanized Mechanical Products

CHICAGO (November 1, 2012) — Wheatland Tube Company, a division of JMC Steel Group, announced today that David Devine has joined the company as the general manager for fence and galvanized mechanical products. In this role, David will be responsible for driving the sales and product management for fence products, along with the development and implementation of a market plan for Wheatland to reenter the galvanized mechanical tube market.

Devine has a proven track record of growing sales and new markets on a national level, with more than 19 years of experience in the mechanical tube market. Most recently, he served as national sales manager — energy solutions for Atkore / Unistrut Construction, where he was in charge of the design and build of structural racking solutions, incorporating galvanized mechanical tube and custom roll-formed profiles.

Devine has also held regional and national sales roles within the mechanical tube and construction sales divisions, where he was responsible for the revenue growth of the western half of the United States as well as foreign markets, and for the introduction and development of mechanical products into both the solar and construction industries by working with manufacturers, distributors and contractors.

“We are excited to welcome David to the Wheatland team,” said Frank Riddick, chief executive officer of JMC Steel Group. “David’s great deal of experience in new business development, steel fabrication, technical and engineered practices will greatly benefit Wheatland as we progressively move forward in the galvanized mechanical tube market.”

About Wheatland Tube

Wheatland Tube, a division of JMC Steel Group, produces a wide range of steel tubular products, including standard steel pipe; DOM mechanical tubing; fence framework; fire sprinkler pipe; electrical conduit; elbows, couplings and nipples; oil country tubular goods and line pipe meeting API specifications.
