

# Summer in the Mountains – Family Holidays in Tirol

**An active holiday in the mountains has all the elements to create a fulfilled and fun-filled family break.**

When planning a family holiday move away from the administrative role of booking flights and searching for accommodation and invest some energy visualising how that time away will be best spent. An active holiday in the mountains has all the elements to create a fulfilled and fun-filled family break. During the school holiday months of July and August the local tourist boards in the Austrian Tirol have put together some exciting and varied children's programmes. The activities are all about giving children the opportunity to create their own adventures, whilst others are focussed on engaging parents too and offering the chance to be together as a family. Flexibility on a family holiday is key and as registration is up to 5pm the day before families have the freedom to pick and choose what works best for them. And with cost a high priority too, it is good to know many of the activities are at affordable prices and some are even free.
