Continued growth for Nimo-KG

“2015 was another record year”

Nimo-KG is showing record results for the second year in a row. Reinforcements on the design side, increased demand and an entirely new product on the market are just some of the reasons why 2015 was another record year for the Skåne-based company.

“We started the year strongly with a number of new orders at the same time that we completed several deliveries. That led to the strongest year in the company's history”, says Martin Olsson, MD of Nimo-KG.

Nimo-KG increased its turnover from 43.2 MSEK in 2014 to 56.2 MSEK in 2015. This is the second year in a row that the company has achieved a record result. The completed delivery to Findus was one of the reasons for this success, but even without that order the Skåne-based company would have had a record year.

“We expanded both in Sweden and overseas with a number of large orders. At the same time, we reinforced our expertise with a new design engineer and moved into new offices, which provided a boost for the whole company.”

Nimo-KG's goal for the forthcoming year is to maintain a continued stable turnover level with an annual growth of 8-10%.

“We have an exciting year before us, with new collaborations in both Sweden and internationally, including an OEM order from Portugal, and the launch of a new generation of single column lifts. The basis for our success is continuing to offer high-quality solutions to our customers' problems and needs”, says Martin Olsson, MD of Nimo-KG.

Nimo-KG has achieved a record result for the second year in a row, says Martin Olsson, MD.
