

## Design project by Award Winning Design firm open for tours in Washington, DC at Capital Oral and Facial Surgery Center

**Maybe the most beautiful practice in the world**

**Washington, DC** - Award winning design firm, Forma Design Inc., recently completed their latest stunning project for Oral and Maxillofacial Surgeon Dr. Virginia Lee that is so breathtakingly beautiful, the office is open for tours every Friday from 3-5 pm at 1145 19th St., Suite 777 Washington, DC now through June 30, 2012.

Like the stark beauty of an orchid, **Capital Oral & Facial Surgery Center** has been transformed into an exquisite example of clean lines and functionality as simple and refined as the orchid itself and has to be seen to be believed. Design enthusiasts, architects, builders, developers and artists alike are invited marvel at the aesthetic creation of this medical office. Call (202) 296-6600 to schedule your appointment.

When Dr. Virginia Lee decided to move her office to accommodate her ever expanding practice, she knew she wanted the 'most beautiful office in the world.' Her vision became a reality when she commissioned FORMA Design, Inc. an internationally recognized, award winning architectural firm to make her dream come true. One of the first things she did was to relocate and move onto the 7th floor of the building she was in and take over suite number 777.

"Number 7 has always been good luck for me. I decided to make my suite number 777 to exponentially increase the good fortune for myself and for every patient who walks through my door. I wanted to create an experience of aesthetic calm and tranquil happiness for myself, my staff and my patients. This is exactly what FORMA design has done. And, to be honest, my good fortune has increased in a way that is inexplicable. There is something about being in a beautiful space that just does something to the soul," says Dr. Lee.

Dr. Lee's office is a compliment to the style of treatment Dr. Lee delivers to her patients. She is a perfectionist at her craft and delivers both an aesthetic and functional product with each and every surgical procedure she performs. Her attention to detail coupled with her knowledge of the most state-of-the-art procedures in a peaceful and serene surgical office combines to make the patients' experience relaxing and calm.

This is exactly what you will discover for yourself when you book your tour to see this amazing space on Fridays now through the end of June, 2012.

**Andreas Charalambous, AIA, IIDA Principal of Forma Design, said,** "It was important that the space reflected the doctor's Asian heritage without being trite or cartoonish. The spaces are evocative of an Asian aesthetic while maintaining a modern approach to space and materials. This was an interesting yet fun and challenging project and we are proud of the result."
