Holmen's business concept is to own and add value to the forest. Our extensive forest holdings are the foundation of our business. Using our own production facilities, the growing trees are refined into everything from wood for climate-smart building to renewable packaging, magazines and books, while at the same time we generate hydro and wind power on our own land. A business that not only creates value for shareholders and customers, but also contributes to a better climate and thriving rural communities. In 2019 Holmen's net sales were approx. SEK 17 billion and the group has approx. 3 000 employees. Holmen's shares are listed on Nasdaq Stockholm, Large Cap. For more information, visit holmen.com
