Avago Technologies Named One of America's Most Trustworthy Companies by *Forbes*

SAN JOSE, Calif., and SINGAPORE, April 3, 2012 -- Avago Technologies (Nasdaq: [AVGO](#)), a leading supplier of analog interface components for communications, industrial and consumer applications, today announced it has been named one of the 100 "[Most Trustworthy Companies](#)" that trade on U.S. stock exchanges by *Forbes* magazine. The list is based on quantitative and qualitative analysis to assess companies' quality of accounting and management practices.

Independent financial analytics company GMI Ratings evaluated more than 8,000 companies to create the list, and Avago was one of only eight companies recognized in the survey's large market capitalization category. Avago earned an accounting and governance risk (AGR) score of 92 out of a possible 100, with an average AGR score of 87 for the last four quarters.

"It is an honor for us at Avago to receive this recognition from a highly respected voice in the financial community such as *Forbes*," said Doug Bettinger, senior vice president of Finance and CFO at Avago. "This is the second recognition for the financial management of Avago in the last few months, which we regard as a reflection of the overall fiscal health and stability of our company."

In December 2011, the Global Semiconductor Alliance named Avago the "[Best Financially Managed Semiconductor Company](#)" for 2011.

About Avago Technologies

Avago Technologies is a leading supplier of analog interface components for communications, industrial and consumer applications. By leveraging its core competencies in III-V compound and silicon semiconductor design and processing, the company provides an extensive range of analog, mixed signal and optoelectronics components and subsystems to approximately 40,000 end customers. Backed by strong customer service support, the company's products serve four diverse end markets: wireless communications, wired infrastructure, industrial and automotive electronics, and consumer and computing peripherals. Avago has a global employee presence and heritage of technical innovation dating back 50 years to its Hewlett-Packard roots. Information about Avago is available on the Web at www.avagotech.com.
