
Elektta increases focus on digitization – hires Sukhveer Singh to drive Elektta Digital strategy

STOCKHOLM – Digital solutions are high on the agenda for most industries, especially within healthcare. Under the umbrella of Elektta Digital, Elektta has a history of helping its customers to improve clinical management and patient outcomes. Today, the company announced the hire of Sukhveer Singh as its new President of Oncology Informatics solutions to lead Elektta's efforts in this area and take it to the next level.

Richard Hausmann, Elektta's CEO, said: "As part of our Precision Radiation Medicine strategy, we envision a future where software alone can help cure cancer, and I am very happy that Sukhveer will join our team and help drive our Elektta Digital initiatives further. His experience will support Elektta's development and commercial launch of solutions focused on the adoption of big data, cloud-computing, and personalized medicine within healthcare."

Sukhveer brings with him over 20 years of international experience with industry-leading healthcare companies, as well as top-tier business school education and strategic management consulting experience. He will start at Elektta on June 25.
