

Tilgin receives a new extension order from a large European operator

Stockholm, May 26, 2015: Tilgin, a leading provider of Home Gateway solutions for multiplay and next-generation broadband access, has received a new extension order from large operator in Europe. The value of this extension order is over 4 MUSD.

The operator is building one of the largest Next Generation fiber Network deployments in Europe. Throughout year 2013 and 2014 Tilgin has already delivered a full broadband access solution, including home gateways products, Tilgin's management system – tGem and support services to the operator. This new order is an extension of an already existing frame agreement that will enable the operator to continue its volume rollout during 2015.

“This extension order is the third one and proves once again the ability Tilgin has to deliver high quality products demanded by the operator. This is an important order for us and we look forward to continue to develop our partnership in the future.” says Jonny Wetterborn CEO at Tilgin.
