INTERIM REPORT 1 APRIL – 31 DECEMBER 2012 (9 MONTHS)

1 April – 31 December 2012 (9 months)

- Revenue rose by 3 percent to SEK 3,940 million (3,836).
- Operating profit decreased by 8 percent to SEK 326 million (353).
- Profit after financial items decreased by 8 percent to SEK 309 million (336) and profit after tax rose by 2 percent at SEK 250 million (245).
- Earnings per share (EPS) totalled SEK 11.35 (10.95). For the latest 12-month-period, EPS amounted to SEK 15.05 (14.30).
- Cash flow from operations reached SEK 295 million (287). For the latest 12-month-period, cash flow per share was SEK 19.45 (17.40).
- Return on equity was 33 percent (35) and the equity ratio was 37 percent (37).
- Since the start of the financial year, eight acquisitions made by the group have taken effect, one of which after the end of the period, adding sales of about SEK 590 million on an annual basis.

1 October – 31 December 2012 (3 months)

- During the third quarter, revenue rose by 2 percent to SEK 1,415 million (1,383).
- Operating profit decreased 16 percent to SEK 106 million (127) and operating margin amounted to 7.5 percent (9.2).
- Earnings per share amounted to SEK 4.40 (3.95) during the quarter.

Revenue in the Addtech Group rose by 3 percent during the first nine months to SEK 3,940 million (3,836). Comparable units displayed a decrease of 4 percent and acquired growth totalled 9 percent. Exchange rate changes had an adverse effect of 2 percent of revenue, corresponding to SEK 58 million, and an adverse effect of 1 percent on operating profit, corresponding to SEK 4 million.

Revenue in the third quarter rose by 2 percent to SEK 1,415 million (1,383). For comparable units, decrease was 7 percent and acquired growth totalled 11 percent. The negative currency effect had a 2 percent impact on revenue, corresponding to SEK 21 million, and a 1 percent impact on operating profit, corresponding to SEK 1 million during the quarter.

The unease permeating the majority of the Group's markets during Q1 continued throughout the autumn. This entailed variations in demand between the months, but overall it meant that the Group's sales for comparable units also fell for Q3. The decrease was above all in sales of production components to manufacturing customers in the vehicle, paper and pulp, and engineering industries. In addition, more manufacturing customers chose to halt their production for a longer period in December 2012 compared to previous years. The generally somewhat more gloomy market does include positive trends in certain customer segments and product niches. Demand from Nordic healthcare, medical technology customers and the energy segment continued to develop well.

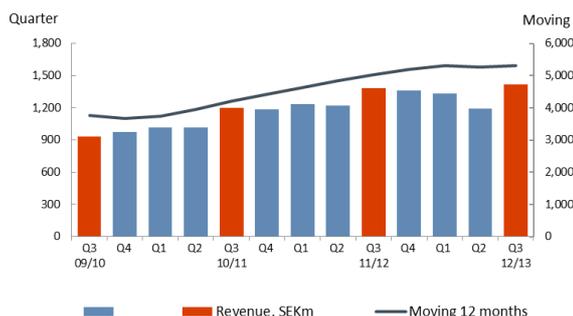

For the Group as a whole, the weaker economy above all affected operations in Sweden and Denmark during the autumn.

The Group's operations in Norway, Finland and in markets outside the Nordics experienced generally more stable market conditions in the period. During the autumn the Group initiated activities that affect costs and working capital in the operations that are experiencing weaker business conditions.

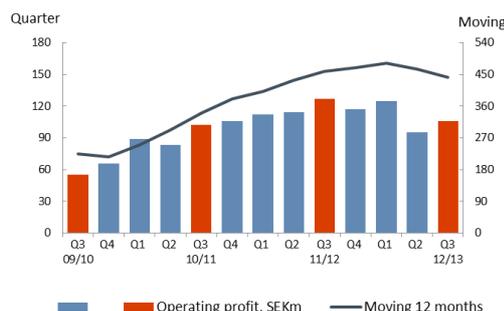

Eight acquisitions carried out by the Group took effect in the financial year, one of which after the end of the period, adding sales of about SEK 590 million. The acquired companies contributed to sales and profit in accordance with expectations during the period. During the interim period, operating profit decreased by 8 percent to SEK 326 million (353) and the operating margin reached 8.3 percent (9.2). The operating margin before amortisation of intangible non-current assets equalled 9.4 percent (10.2). Net financial items were SEK -17 million (-17) and profit after financial items decreased by 8 percent to SEK 309 million (336). During the third quarter, operating profit decreased 16 percent to SEK 106 million (127), and profit after financial items to SEK 98 million (120).

Profit after tax for the interim period rose by 2 percent to SEK 250 million (245) and EPS increased to SEK 11.35 (10.95). The effective tax rate was 19 percent (27). Following a decrease in the tax rate in Sweden in 2013 from 26.3 to 22 percent, deferred tax has preliminarily been lowered by SEK 24 million, net. Excluding this change, the effective tax rate for the period would have been 27 percent.

Revenue

Operating profit

Business areas

ADDTECH COMPONENTS

Addtech Components markets and sells components and subsystems in mechanics, electromechanics, hydraulics and electronics as well as automation solutions to customers in manufacturing.

Addtech Components' revenue increased 1 percent to SEK 1,151 million (1,143). Operating profit amounted to SEK 76 million (93). The weakening in demand that started during Q2 continued in Q3. The business climate has varied between different customer segments and geographical areas. Certain Nordic manufacturing companies reduced their demand during the autumn, especially in the vehicle and engineering industry segments. In the medical technology and energy customer segments, however, demand remained stable. The weaker economy affected operations in Sweden and Denmark the most, while Finland was more stable. The market in Norway continues to be fragmented; performance decreased in the Norwegian manufacturing industry, while customers in the oil and gas industry had better demand.

ADDTECH ENERGY

Addtech Energy markets and sells battery solutions, electric power distribution products and products for electrical safety, electrical installations and connection technology. Its customers are in the energy and telecom sectors and the commercial vehicle industry. Addtech Energy's revenue amounted to SEK 1,124 million (1,041), which is a 8 percent increase. Operating profit amounted to SEK 111 million (117). On the whole in the period, demand was stable for the business area. Some operations have been affected by a weaker economy, while others have continued to experience a positive business climate. Although the market for new types of battery technology has been more hesitant, demand for traditional battery solutions was relatively good. Demand for products in electrical safety and electrical installation as well as aftermarket products for the energy segment was stable overall during the period, even though some manufacturing customers had decreased demand in Q3. The business situation remains unchanged and in certain cases even optimistic for niche products in electricity distribution.

ADDTECH INDUSTRIAL SOLUTIONS

Addtech Industrial Solutions markets and sells machinery components, polymer products, electric motors and transmissions, customised products in electromechanics and equipment and consumables for customers in manufacturing. Products under own brands are marketed and sold to industrial customers locally and globally.

Addtech Industrial Solutions' revenue decreased 8 percent to SEK 857 million (932). Operating profit amounted to SEK 66 million (82). The weakened demand that we saw earlier in the year continued during Q3 and is noticeable in more market segments than before. Demand for machinery components and production equipment as well as polymer materials in the Danish market was weak in Q3. New projects were delayed and demand dropped for electromechanical components to several large customers in the special vehicle industry. The business climate for electric motor solutions, which was weak at the start of the financial year, had better demand in the most recent quarter.

ADDTECH LIFE SCIENCE

Addtech Life Science markets and sells instruments, consumable supplies and services to laboratories in healthcare and research, diagnostic equipment for the healthcare sector and process and analysis equipment for industry.

Revenue for Addtech Life Science amounted to SEK 812 million (725), which is a 12 percent increase. Operating profit reached SEK 81 million (73). Demand for the business area regarding diagnostic equipment and reagents from the Nordic healthcare sector remains favourable. During the financial year, some deliveries to certain customers have moved between the quarters, entailing a negative impact on Q2 and a positive impact on Q1 and, to a certain extent, on Q3. During the period, business conditions remained stable for equipment to Nordic healthcare laboratories and research laboratories. Market conditions regarding measuring and analysis instruments to the Nordic process industry were somewhat hesitant during Q3 in the Swedish market, but remained stable in the rest of the Nordic region.

Profitability, financial position and cash flow

Return on equity was 33 percent (35), and return on capital employed was 27 percent (33).

Return on working capital, P/WC (operating profit in relation to working capital), stood at 47 percent (53) at the end of the period.

The equity ratio at the end of the period stood at 37 percent (37). Equity per share, excluding non-controlling interests, amounted to SEK 49.00 (42.50). At the end of the period, the Group's financial net debt amounted to SEK 677 million (493), including pension liability of SEK 199 million (196). Net debt in relation to operating profit with amortisation and depreciation added back (EBITDA) amounted to 1.2 (0.9). The net debt/equity ratio stood at 0.6 (0.5).

Cash and cash equivalents, consisting of cash and bank balances, together with granted but unused credit totalled SEK 572 million (512) at 31 December 2012.

Cash flow from operating activities amounted to SEK 295 million (287) during the period. Investments in non-current assets were SEK 31 million (25) and divestments of non-current assets totalled SEK 2 million (1). Settlement of purchase prices for acquisitions implemented in previous years totalled SEK 223 million (130).

Employees

At the end of the period the number of employees was 1,936, which can be compared to 1,700 at the beginning of the financial year. Acquisitions made during the period added 240 employees. The average number of employees during the most recent 12-month period was 1,736 (1,571).

Ownership structure

Share capital amounted at the end of the period to SEK 51.1 million.

Class of shares	Number of shares
Class A shares	1,089,504
Class B shares	21,643,328
Total number of shares before repurchases	22,732,832
Repurchased class B shares	-891,500
Total number of shares outstanding, after repurchases	21,841,332

The 891,500 class B shares held in treasury correspond to 3.9 percent of the total number of shares outstanding and 2.7 percent of the votes. The average acquisition cost for repurchased shares was SEK 124 per share. The last price paid for the Addtech share on 11 February 2013 was SEK 196.00. The average number of shares held in treasury during the period was 956,810 (723,164).

In accordance with a resolution of the August 2012 AGM, 25 members of management were offered the opportunity to acquire 200,000 call options on Class B shares repurchased by the Company. The programme was fully subscribed for. If the options are fully exercised, the number of Class B shares outstanding will increase by 200,000, equivalent to 0.9 percent of the total number of shares and 0.6 percent of the votes. The call options were transferred at a price of SEK 11.60 per option, equivalent to the fair (market) value of the options based on an external valuation.

The redemption price of issued call options attributable to the share-based incentive scheme for 2009 is SEK 127.70; the redemption period is 3 September 2012 until 14 June 2013, inclusive. During the period 3 September until 31 December 2012 inclusive, 95,300 options, of the total 236,000 options, were exercised for shares.

The redemption price of issued call options attributable to the share-based incentive scheme for 2010 is SEK 164.70; the redemption period is 16 September 2013 until 30 May 2014, inclusive.

The redemption price of issued call options attributable to the share-based incentive scheme for 2011 is SEK 179.40; the redemption period is 15 September 2014 until 29 May 2015, inclusive.

The redemption price of issued call options attributable to the share-based incentive scheme for 2012 is SEK 214.50; the redemption period is 14 September 2015 until 3 June 2016, inclusive.

Issued call options for repurchased shares represent a potential dilution of approximately 0.2 percent during the last 12-month period (0.3). The corresponding dilution effect is 0.3 percent for the interim period (0.2) and 0.2 percent for the latest quarter (0.1). The market price of the share was SEK 186.00 as of 31 December 2012.

Acquisitions

During the period 1 April to 30 September 2012, Addtech acquired Staubo Elektro Maskin AS to become part of the Addtech Energy business area and ASI Automatikk AS to become part of the Addtech Components business area. For more information on these acquisitions, see previous interim reports and Addtech's website.

Five companies were acquired during Q3:

On 1 October Addtech acquired Leica Nilomark Oy, which will form part of the Addtech Life Science business area. Leica Nilomark offers consumables and instruments to healthcare and medical research laboratories. Leica Nilomark has ten employees and sales of around EUR 3 million.

Active Care Sverup AB was acquired on 8 October to become part of the Addtech Life Science business area. Active Care offers medical technology products and related consumables. Active Care has eight employees and sales of around SEK 25 million.

The acquisition of Quality Documentation Scandinavia AB ("QDOC") came into force on 1 November and the company became part of the Addtech Components business area. QDOC is a technology trading company in the field of fibre and copper instruments as well as measuring, monitoring and documentation

of networks. QDOC has five employees and sales of around SEK 11 million.

The acquisition of the Necks Electric-group also came into force on 1 November and the company became part of the Addtech Energy business area. The Necks Electric-group is a supplier of complete customized systems for power transmission lines. The Necks Electric-group has subsidiaries in Sweden, Poland, Norway and Finland. The Necks Electric-group has 175 employees and sales of around SEK 220 million.

On 30 November Addtech also acquired Vallin Baltic AS and Vallin Baltic SIA, which will form part of the Addtech Energy business area. Vallin Baltic AS and Vallin Baltic SIA are technology trading companies, providing products for electrical installations with measure systems belonging to it as well as telecom equipment in the Baltic countries. The Vallin Baltic companies have 20 employees and sales of around SEK 50 million.

During the third quarter agreements were signed for acquisition of The Norsk Analyse Group, to become part of the Addtech Life Science business area. The acquisition came into force on 7 January 2013.

The total consideration for the period's seven acquisitions was SEK 239 million. The combined effect of the acquisitions on the Addtech Group's revenue was SEK 135 million, on operation profit SEK 9 million and on profit after tax for the period SEK 7 million. Had the acquisitions been carried out at 1 April 2012, they would have had an effect of about SEK 354 million on consolidated revenue, about SEK 33 million on operating profit and about SEK 23 million on profit after tax for the period.

According to the preliminary acquisition analyses, the assets and liabilities included in the acquisitions were as follows:

	Carrying amount at acquisition date	Adjustment to fair value	Fair value
Intangible non-current assets	0	115	115
Other non-current assets	15	-	15
Inventories	47	-	47
Other current assets	114	-	114
Deferred tax liability/tax asset	-1	-29	-30
Other liabilities	-106	-	-106
Acquired net assets	69	86	155
Goodwill			84
Non-controlling interests			-
Consideration ¹⁾			239
Less: cash and cash equivalents in acquired businesses			-32
Less: consideration not yet paid			-26
Effect on the Group's cash and cash equivalents			181

1) The consideration is stated excluding acquisition expenses.

For acquisitions that resulted in ownership transfer during the interim period, transaction costs totalled SEK 2 million and are recognised in selling expenses.

Out of total consideration not yet paid for acquisitions made during the period, calculated contingent considerations amount to SEK 19 million, which comprises about 92 percent of the maximum outcome. The amount is dependent on achieved profits in the companies and has a maximum limit.

During the period, SEK 4 million, net, was recognised under other operating income, because estimated contingent considerations from earlier acquisitions deviated from actual outcomes.

The development of acquisitions implemented during earlier periods has not entailed a change in total liabilities regarding contingent considerations.

Accounting policies

This interim report was prepared as per IFRSs and IAS 34 Interim Financial Reporting. The accounting policies and basis for calculations applied in the latest annual report were also used here.

The interim report for the parent company was prepared in accordance with the Swedish Annual Accounts Act (1995:1554) and the Securities Market Act (2007:528), in compliance with recommendation RFR 2 Accounting for Legal Entities, of the Swedish Financial Reporting Board.

No revised IFRSs or interpretations issued by the IFRIC that are applicable as of the 2012/2013 financial year have had any effect on the Group's or the Parent Company's profit, financial position or disclosures.

Parent Company

The Parent Company's revenue amounted to SEK 34 million (25), and profit after financial items to SEK 26 million (7). This amount includes revenues of SEK 20 million (6) from shares in Group companies. Net investments in non-current assets totalled SEK 0 million (0). The Parent Company's financial net debt at the end of the period amounted to SEK 26 million, compared to SEK 69 million at the beginning of the fiscal period.

Nomination committee

The 2012 Annual General Meeting authorised the Board Chairman to establish a nomination committee for upcoming elections to the Board, by appointing representatives from among the five shareholders who controlled the largest number of votes in the Company at 31 December 2012, to serve with the Chairman on the nomination committee. In accordance with the above, the committee comprises these appointed members: Anders Börjesson (Chairman of the Board), Tom Hedelius, Marianne Nilsson (appointed by Swedbank Robur), Martin Wallin (appointed by Lannebo Fonder) and Johan Strandberg (appointed by SEB Fonder). Information on how to contact the committee is available on the Addtech website.

Transactions with related parties

No transactions between Addtech and related parties that have significantly affected the Group's position and earnings have taken place during the period.

Events after the end of the interim period

One company acquisition took place after the end of the reporting period.

On 7 January Addtech acquired The Norsk Analyse Group, which will form part of the Addtech Life Science business area. The Norsk Analyse Group sells system solutions and analysers for gas- and liquid analysis as well as performs service and maintenance on delivered equipment. The Norsk Analyse Group has around 60 employees and sales of around NOK 120 million.

The acquisition analyses are not yet complete and will be presented in the next interim report.

No other events of significance to the Group occurred after the end of the reporting period.

Risks and factors of uncertainty

Addtech's income and financial position, as well as its strategic position, are affected by a number of internal factors under Addtech's control and by a number of external factors over which Addtech has limited influence. The most important risk factors for Addtech are the state of the economy, combined with structural change and the competitive situation. Risk and uncertainty factors are the same as in previous periods, please refer to section Risks and uncertainties (page 25-27) in Addtech's 2011/2012 annual report for further details.

The Parent Company is indirectly affected by the above risks and uncertainty factors due to its role in the organisation.

Stockholm, 12 February 2013

Johan Sjö
President and CEO

This report has not been subject to review by the Company's auditor.

The year-end report for the period 1 April 2012 – 31 March 2013 will be published on 14 May 2013.

The Annual General Meeting will be held in Stockholm at 4.00 p.m. on 28 August 2013.
