## Pemamek to supply highly advanced panel line to MV Werften Rostock shipyard

Pemamek signs a landmark deal with MV Werften to deliver Europe's most advanced thin panel laser-hybrid welding line.

### Pemamek to provide high-quality and productivity

Pemamek has won a significant deal to deliver a state-of-art panel line to MV Werften's Rostock shipyard. The Rostock shipyard, located in the north of Germany, is one of the three large shipyards that are owned and operated by MV Werften.

The assigned delivery is a part of an extensive investment program of MV Werften. The contract covers designing, delivery, site training and assistance.

-With the investment in our Rostock yard and especially in this new and most efficient welding method, we will further increase our steel prefabrication capacity and thus improve our productivity, tells **Jarmo Laakso, Managing Director of MV WERFTEN**.

### Leading PEMA laser-hybrid panel line

The complete solution of PEMA thin panel laser-hybrid panel line consists of most modern solutions available in the markets, such as integrated one sided welding and milling station, integrated profile assembling and welding station and robotized welding of T-beams to the deck panels, just to name a few.

The thin panel laser-hybrid welding line does not only contain welding processes, but also complete production chain from material handling to milling providing high-quality end products. It will enable MV Werften to tremendously improve manufacturing efficiency and add capacity. Through the investment in advanced welding methods, the shipyard will acquire one of the most modern panel lines in Europe.

- We are extremely pleased to be awarded with this order. It clearly demonstrates Pemamek's commitment to continuous product development and to provide the best technology to our customers, adds **Jaakko Heikonen, CEO of Pemamek Ltd.**

### About MV Werften

*MV Werften is a group of the three largest shipyards in the German state of Mecklenburg-Vorpommern (MV). The three shipyards locate in Wismar, Rostock and Stralsund. MV Werften, employing 1400 persons, designs and builds world class river ships, mega yachts, luxury cruise ships, but also the largest cruise vessels ever built in Germany.*
