

Press Release

Stockholm, Sweden, 10 September 2019

Hexagon to showcase its Smart Buildings & Infrastructure and Smart Cities & Nations portfolios at INTERGEO 2019

Hexagon AB, a global leader in sensor, software and autonomous solutions, is showcasing its Smart Buildings & Infrastructure and Smart Cities & Nations portfolios at the [INTERGEO](#) expo and conference in Stuttgart, Germany, 17-19 September.

The event's theme, "Knowledge and Action for Planet Earth," and special focus on the expansion of digital technology in mobility, construction and location intelligence applications, tie directly to Hexagon's overarching value proposition: to shape production and urban ecosystems to become fully autonomous and connected.

As stated by Hexagon's President and CEO, [Ola Rollén](#), "The ultimate form of data leverage is when tasks and processes become autonomous, which is the goal of our smart solutions portfolios. We help customers leverage the data within their workflows to achieve the greatest efficiency, productivity and quality outcomes possible. When we collectively achieve these outcomes at scale, not only can we sustain growth for our businesses, but also this finite planet we all share... fewer resources, less waste, less pollution."

On site, Juergen Dold, President of Hexagon's Geosystems division, will give a keynote address on 17 September discussing how technological progress changes the conditions under which business is done and fosters opportunities for new business models.

In the exhibition area, Hexagon will showcase solutions that help manage the life of a building (from initial land surveying, through design, build, maintenance, renovation and demolition) and optimize the successful delivery of heavy infrastructure projects. Key highlights include the recently introduced [Leica DSX utility detection solution](#) as well as building design software ([BricsCAD](#)) and solutions for ensuring building construction projects are completed on time and on budget ([HxGN SmartBuild](#)). Also on display will be reality capture solutions that apply the power of location intelligence to meet the growing needs of cities and nations. Key highlights include the recently introduced [Leica BLK2GO mobile reality capture solution](#) as well as the [HxGN Content Program](#) and the [Hexagon Smart M.Apps](#) and [Luciad](#) portfolios.

New solutions for enabling autonomous connected ecosystems will also be announced and on display for the first time. Stay tuned and join Hexagon onsite in in Hall 1 (Booths B1.022 B1.027) and 4 (Booth F4.068). Hexagon is a global leader in sensor, software and autonomous technologies. We are putting data to work to boost efficiency, productivity, and quality across industrial, manufacturing, infrastructure, safety, and mobility applications.

Our technologies are shaping urban and production ecosystems to become increasingly connected and autonomous – ensuring a scalable, sustainable future.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 20,000 employees in 50 countries and net sales of approximately 3.8bn EUR. Learn more at [hexagon.com](https://www.hexagon.com) and follow us [@HexagonAB](https://twitter.com/HexagonAB).
